REGISTRATION:
1. Go to the following website: www.mymathtest.com
2. Click Register
3. Scroll down and click I Accept
4. Next to “Do you have a Pearson Education Account?” click “No” and then fill in a login name and password and then reenter your password. Write this information down someplace so that you won’t forget what you used.
5. Enter the following access code exactly as shown below:
   WSSMMT-GIBLI-LOACH-PYRAN-ABBOT-WAXES
   then click Next
6. Under Account Information put your real name and an email address that you check on a regular basis. For the school zipcode put 60067 and then pick WM RAINERY HARPER COLLEGE from the list of schools. Fill in the security question information and then click Next.
7. You can print the Confirmation & Summary page.

ACCESSING THE TESTS AND PRACTICE MATERIALS:
1. Go to the following website: www.mymathtest.com
2. Under type the login name and password that you just created and then click Log In
3. Click Enter MyMathTest
4. Under Enroll in a new placement program type the following course ID number:
   XL28-U17I-6017-40W2
   You should now see the following: Prep for Compass Math Harper 2016
5. On the announcement page, click Browser Check, so that the system will check if there are any plugins that your computer needs for this site.
6. Now you are ready to begin. Click Take a Test. Click Practice Tests
7. Click on The Real Number System R2-A (or you can start at a higher level topic. On the announcement page there is a list of tests that you should work through to place into a particular class).
8. Click I am ready to start
9. Answer the question, click and continue through the test.
10. Click when you are done.
11. You can now click Review Test or Go to Results.
12. Now click Study Plan. Click View all chapters
13. Click on the “+” next to Ch. R2: The Real Number System to expand the list of topics. You can then click the “+” next to each of the subtopics listed there. There is a by it and work on the practice problems there. Take advantage of the buttons that say Help Me Solve This and View an Example. There are also some practice problems that have a button that says
   14. Keep clicking the topics that have a by them and keep practicing problems.
15. When you think you are ready, you can take the post test for The Real Number System. Click Practice Tests and click on The Real Number System R2-B. Take this test and then look at your study plan to see if any of the were removed. If there are still next to any of the topics under The Real Number System, then you still need to practice more and retake the test again.
16. You can continue to work in this way: Take test R3-A. Go to the study plan to see what you need to work on under R3. Practice, practice, practice and then take test R3-B and see which pins were removed from your study plan. If there are any pins left, you still need to work on those specific topics. Keep progressing through the tests as high as you can.
   You will only have access to this site for 16 weeks so review all you can in that time :0)
