3. Gross profit equals the difference between net sales and
   a. operating expenses.
   b. cost of goods sold.
   c. net income.
   d. cost of goods sold plus operating expenses.

4. Income from operations appears on
   a. both a multiple-step and a single-step income statement.
   b. neither a multiple-step nor a single-step income statement.
   c. a single-step income statement.
   d. a multiple-step income statement.

5. The entry for a buyer to record the return of goods under a perpetual inventory system assuming the purchase was made on account would include a
   a. debit to inventory
   b. debit to purchase returns and allowances
   c. credit to accounts payable
   d. debit to accounts payable

6. Under the perpetual system, cash freight costs incurred by the buyer for the transporting of goods is recorded in which account?
   a. Freight Expense
   b. Freight-In
   c. Inventory
   d. Freight-Out
7. Cost of goods sold can be calculated by which of the following formulas?
   a. Beginning Inventory + Net Purchases – Ending Inventory
   b. Ending Inventory + Net Purchases – Beginning Inventory
   c. Beginning Inventory + Sales – Ending Inventory
   d. Ending Inventory + Sales – Beginning Inventory

8. The entry to record a sale of $1,800 with terms of 2/10, n/30 will include a
   a. debit to Sales Discounts for $36.
   b. debit to Sales Revenue for $1,764.
   c. credit to Accounts Receivable for $1,800.
   d. credit to Sales Revenue for $1,800.

9. The entry to record the receipt of payment within the discount period on a sale of $10,000 with
   terms of 3/15, n/60 will include a
   a. credit to Sales Discounts for $300.
   b. debit to Cash for $9,700.
   c. credit to Accounts Receivable for $9,700.
   d. credit to Sales Revenue for $10,000.

10. Under a perpetual inventory system
    a. accounting records continuously disclose the amount of inventory.
    b. increases in inventory resulting from purchases are debited to purchases.
    c. there is no need for a year-end physical count.
    d. the account purchase returns and allowances is credited when goods are returned to vendors.

11. A company using a perpetual inventory system that returns goods previously purchased on credit
    would
    a. debit Accounts Payable and credit Inventory.
    b. debit Sales and credit Accounts Payable.
    c. debit Cash and credit Accounts Payable.
    d. debit Accounts Payable and credit Purchases.

12. In the credit terms of 3/15, n/60, the “15” represents the
    a. number of days in the discount period.
    b. full amount of the invoice.
    c. number of days when the entire amount is due.
    d. percent of the cash discount.

13. Under the perpetual system, cash freight costs incurred by the seller for the transporting of goods is
    recorded in which account?
    a. Freight Expense
    b. Freight-In
    c. Inventory
    d. Freight-Out
14. Livingston Company sells merchandise on account for $6,000 to Briggs Inc. on April 10 with credit terms 3/15, n/60. Briggs returns $1,000 of the merchandise on April 15. Briggs paid for the remainder of the goods within the discount period on April 20. What entry would Briggs make to record the return on April 15 if it uses the perpetual inventory system?

a. Cash 1,000
   Inventory 1,000

b. Accounts Payable 1,000
   Inventory 1,000

c. Accounts Payable 970
   Inventory 970

d. Purchase Returns 1,000
   Inventory 1,000

15. Livingston Company sells merchandise on account for $6,000 to Briggs Inc. on April 10 with credit terms 3/15, n/60. Briggs returns $1,000 of the merchandise on April 15. Briggs paid for the remainder of the goods within the discount period on April 20. What entry would Briggs make to record the payment on April 20 if it uses the perpetual inventory system?

a. Accounts Payable 6,000
   Cash 6,000

b. Accounts Payable 5,820
   Cash 5,820

c. Accounts Payable 5,000
   Inventory 150
   Cash 4,850

d. Accounts Payable 5,000
   Sales discounts 150
   Cash 4,850
**EXERCISES**

1. Menke Company is a furniture retailer and uses the perpetual inventory system. On January 14, Menke purchased merchandise inventory at a cost of $45,000. Credit terms were 2/10, n/30. The inventory was sold on account for $60,000 on January 21. Credit terms were 1/10, n/30. The accounts payable was settled on January 23, and the accounts receivables were settled on January 30, 2017. **Prepare journal entries to record each of these transactions.**

Chapter 5 Solutions (Cont.)

Exercise Solutions (Cont.)

2. LOVETT COMPANY

Income Statement (Partial)
For the Month Ended November 30, 20XX

Sales Revenue .................................................................................................................. $190,000
Less: Sales Returns and Allowances ............................................................... $ 8,000
Sales Discounts ........................................................................................................ 2,000
Net Sales .................................................................................................................... 180,000

3. (a) ZALES COMPANY

Income Statement
For the Month Ended January 31, 20XX

Sales
Sales revenue ................................................................................................................. $421,000
Less: Sales returns and allowances ........................................................................... $13,000
Sales discounts .......................................................................................................... 8,000
Net sales .................................................................................................................. 400,000
Cost of goods sold .................................................................................................... 280,000
Gross profit .............................................................................................................. 120,000
Operating expenses
Salaries and wages expense .......................................................................................... 42,000
Rent expense ............................................................................................................. 35,000
Insurance expense ..................................................................................................... 12,000
Freight-out .................................................................................................................... 7,000
Total operating expense ............................................................................................. 96,000
Net income ................................................................................................................ $ 24,000

(sal. rev. – sal. ret./all. – sal. dis – COGS – oper. exp.)

(b) Profit margin = \[
\frac{24,000}{400,000} = 0.06
\]

Gross profit rate = \[
\frac{120,000}{400,000} = 0.30
\]
