

New This Summer: Camp CyberPatriot

CyberPatriot is a nationally recognized Cyber Education Program for youth which motivates students towards careers in cybersecurity, science, technology, engineering, and mathematics (STEM) disciplines. The CyberPatriot program prepares students to participate in a National Youth Cyber Defense Competition. AFA Cybercamps emphasize interactive, hands-on learning of cybersecurity principles that are relevant in today's digital lifestyle. Students will learn the importance of cyber safety and how to protect their personal devices and information from external threats.

- **Module 1: Introduction to Cybersecurity**
- **Module 2: Computer Basics and Virtual Machines**
- **Module 3: Introduction to Windows Security**
- **Module 4: Introduction to Linux Security**
- **Module 5: Advanced Cybersecurity Topics**
- **Capstone:** The Cyberpatriot Capstone will allow students the opportunity to test, evaluate and showcase the skills learned in a team-based project.
