## *Executive Summary*

---

The nation has experienced dramatic change in the last five years, driven primarily by a global economic recession that began in 2008. While there are signs of improvement, the slow recovery has hampered families' ability to return their incomes to pre-recession levels. Unemployment rates, housing values, wages, and many other financial indicators suggest that the resources needed to pay for postsecondary education have been directly impacted as the residents rebuild lost savings and home equity throughout the country.

Yet, at the end of 2013, economic indicators showed unmistakable signs of improvement. Consumer spending, job growth, retail inventories, and overall economic growth all suggested that the national economy was rebounding and is positioned for stronger growth in 2014. However, until fiscal certainty is restored to Illinois, the state's bond rating will not improve and scarce general revenues will be needed for debt payments leading to stagnant or lower levels of funding for other areas.

The Harper district weathered the economic crisis better than the state or national economies. The total wages have been on the rise and the region has been noted as having some of the state's largest increases in the total wages paid. The cost of consumable goods has remained fairly stable in the region and energy prices have steadily declined since 2010. The unemployment, while still high, has been decreasing and it is anticipated to continue the decline. However, it is difficult to ascertain the numbers of discouraged workers that are not included in the unemployment calculation. The Economic Policy Institute estimates there are over 5.7 million discouraged workers across the nation, and it is difficult to determine the number of working age residents in the Harper district who are no longer seeking employment opportunities. Prolonged unemployment is straining the nation's social safety net and is deferring achievement of college and homeownership for many families.

The overall workforce shrank by 4% from 2007 to 2012, but there are opportunities for reskilling to align with growing industries. It is likely that the Health Care and Social Assistance and the Management of Companies and Enterprises industries in the Harper district will continue to have a high growth potential and a highly concentrated presence. Select industries are already experiencing a shortage of qualified workers and those numbers are anticipated to grow.

The district is able to cater to residents along with those who commute into the district for work every day. Of the 335,725 jobs in the Harper district, only 27% are filled by residents leaving 73% filled by workers commuting into the district. An estimated 174,500 residents commute out of the district for their jobs. This trend is likely to continue as more jobs than resident workers are present in the district providing larger markets for professional development and reskilling for local companies.

Workers over the age of 55 experienced a loss of their investments due to the economic decline and have chosen to remain in the workforce longer to recover financially before retirement. This phenomenon has left fewer job openings for entry level workers leading to higher unemployment for the youngest generation ready to begin their career path. The trend is likely to continue until the economy is more favorable for retirees.

There have been many changes in the population in and surrounding the Harper district. Non-Hispanic Whites have been moving out and are being replaced by primarily Hispanic residents and an increasing number of Asian residents. The Harper region is also aging as Baby Boomers, born between 1946 and 1964, are now reaching retirement age putting greater strains on public programs. First generation immigrants make up an estimated 25.6% of the Harper district population which is much greater than the statewide proportion of 14.3%. Immigrants tend to create more small businesses which may account for the faster rate of economic improvement in the Harper region. Household incomes have experienced a stark decline as a result of lost employment leading to increased rates of foreclosures in the area. All but two municipalities in the Harper region lost buying power from 2008 to 2013. However, the area has a much higher median household income than the state as a whole. The higher income levels could sustain significant losses and still remain comparatively high.

The underfunding of Illinois' pension system has a ripple effect in state funding streams as a higher proportion of discretionary funding will go towards the pension funds to bring them current, diverting funds from other domestic priorities such as higher education. Higher education funding increased 15.6% from 2007 to 2012, but this was necessary for pension support and not higher education operations. The state also has the 11<sup>th</sup> highest tax burden of all 50 states translating to fewer discretionary funds to pay for higher education by households throughout the state. The Harper district has the advantage of households having higher incomes leading to more discretionary spending.

Birth rates are at an all-time low which is being felt in the public schools as enrollment is down in kindergarten and first grade. There is almost a 1,200 difference in enrollments between kindergarten and the seniors when aggregating all school districts in the Harper district. The enrollments are similar to the overall population in that the numbers of Hispanic and Asian students are increasing in the schools. The performance of Harper sender schools are well above the state averages along with having well below the state average in dropouts and truancy rates.

Higher education is exploring the boundaries of existing technology as new devices, applications, and teaching strategies undergo exponential growth. To remain competitive in a dense educational landscape, Harper will need to stay on the cutting edge of this technology and knowledgeable about how these tools can support learning. MOOCs have found their place in the toolkit of technology-enabled teaching and learning as the value of hybrid learning and face-to-face interaction continues to be tested and validated. Studies are finding that students can only be successful with these methodologies if they are disciplined enough to stick with the program. Currently 30% of all enrollments is for online coursework, an increase from 10% in 2002. New pedagogical methodologies such as flipped classrooms are gaining in popularity, but require faculty to remain current on how to deploy technology appropriately in the classroom. The collection of data on student progress enables new analytics to better prepare curriculum and programs for improved student success.

Data security will become increasingly critical as Harper students move even more of their learning online. Community college IT departments will be challenged to provide needed technical support for rapidly increasing numbers and types of mobile devices, while continuing to address the learning technology needs of less resourced students.

Distant global changes, most notably in China and India, are impacting the Harper district locally. As these countries continue to industrialize and create a robust middle class with their attendant demands for products, the environment will be increasingly stressed and natural resources threatened. These pressures will test Americans' commitment to sustainability, alternative energy, and environmental protection.

Having a location in a more wealthy area of Illinois has somewhat insulated the more devastating impacts of the recession. The Harper district has not been immune as much of the data shows there have been repercussions, but overall the localized impacts have been relatively low. Harper College's challenge is shared by every other higher education institution in the U.S.: continue to offer the best education and workforce preparation value in its market for an increasingly diverse array of aspiring students.

---

## Key Trends and Considerations

---

### Employment & Work Force

**Trend #1: The great recession that began in 2008 is over and a slow recovery is under way.** It is anticipated that the Harper region will continue to participate in the economic recovery and some indicators suggest the Chicago region will recover at a faster pace than most.

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** Moderate

**Supporting Rationale:**

- Total wages declined until 2010 but are showing signs of improvement. The Harper region experienced the state's largest increase in total wages paid.
- The consumer price index (excluding energy costs) for the Chicago Metropolitan area has remained fairly stable in the last three years.
- Energy costs have fluctuated greatly in the last decade but have steadily declined since 2010.
- As global factors increasingly drive gasoline prices, the share of the total cost that may be controlled at the state and local level is decreasing.

**Sources:**

- Illinois Department of Employment Security. Quarterly Census of Employment and Wages (QCEW) data. <http://www.ides.illinois.gov/page.aspx?item=914>.
- Bureau of Labor Statistics. Consumer Price Index data. <http://www.bls.gov/news.release/cpi.toc.htm>.

**Trend #2: Unemployment has improved in the Harper region, but many discouraged workers are not reflected in the numbers.**

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** Moderate

**Supporting Rationale:**

- Unemployment in the Chicago Metropolitan area decreased from 8.9% in October 2013 to 8.7% in November 2013, with expectations it will continue to improve
- An estimated 5.7 million discouraged workers nationally are not considered when calculating the unemployment rate.

**Sources:**

- Illinois Department of Employment Security. Local Area Unemployment Statistics, 2012.
- Economic Policy Institute. Discouraged Workers. Accessed online: <http://go.epi.org/2013-missing-workers>.

**Trend #3: While total employment in the Chicago Metropolitan Area shrank by 4% from 2007 to 2012, select industries are experiencing a shortage of qualified workers, which is expected to grow.**

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** High

**Supporting Rationale:**

- Health care and social assistance and management of companies and enterprises are relatively concentrated in the Harper region and have good growth potential.

**Sources:**

- Illinois Department of Employment Security, Local Employment Dynamics, 2007 & 2012

**Trend #4: More employees are employed in the Harper district than reside in the Harper district.**

About 27% of the 335,725 jobs in the Harper district are filled by residents with the remainder filled by commuters into the district. An estimated 174,500 Harper area residents work outside of the district.

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** High

**Supporting Rationale:**

- This trend has remained consistent from 2002 through 2011.
- Many workers over 55 are remaining in the workforce to recover lost investments and shore up income, leaving fewer job openings for entry level workers.

**Sources:**

- Illinois Department of Employment Security and U.S. Census Bureau, OnTheMap Application, 2002 through 2011
- Illinois Department of Employment Security, Local Employment Dynamics, 2007 & 2012

## District Demographics

---

**Trend #5: The Harper district population is becoming more diverse in age, race, ethnicity, primary language spoken in the home, and birth place.**

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** High

**Supporting Rationale:**

- Between 2000 and 2010, non-Hispanic white residents in the Harper region decreased by almost 45,000, non-Hispanic Asians increased by 15,000, and Hispanics increased by 24,000.
- First generation immigrants make up an estimated 25.6% of the Harper district population, much greater than the statewide proportion of 14.3%.
- The population is aging with a greater proportion – the Baby Boomers - being over the age of 45.

**Sources:**

- US Census Bureau, American Community Survey, 2008 and 2011 One Year Estimates

- iPUMS Data, Steven Ruggles, J. Trent Alexander, Katie Genadek, Ronald Goeken, Matthew B. Schroeder, and Matthew Sobek. Integrated Public Use Microdata Series: Version 5.0 [Machine-readable database]. Minneapolis: University of Minnesota, 2010.
- Easi Analytics, Inc.

**Trend #6: Median household income has decreased across the Harper district.** Household incomes are not keeping up with inflation and the loss of employment contributes to declining household incomes.

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** Moderate

**Supporting Rationale:**

- All but two municipalities in the Harper region lost buying power between 2008 and 2013.

**Sources:**

- Easi Analytics, 2008 & 2013 data

## Financing of the College

**Trend #7: The underfunding of Illinois' pension system is impacting higher education.** The lack of a long-term solution for Illinois' chronically underfunded pension system has resulted in the downgrading of Illinois' bond ratings. Increased borrowing costs will divert state funds from other domestic priorities including higher education.

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** High

**Supporting Rationale:**

- Illinois increased support for higher education 15.6% from 2007 to 2012, but this was for pension payments – not educational services.
- Illinois has the 11<sup>th</sup> highest tax burden of all states in the U.S. which translates to fewer discretionary funds to pay for higher education.

**Sources:**

- State Higher Education Executive Officers Association. *State Higher Education Finance Report*. FY2012.  
Accessed online: <http://www.sheeo.org/sites/default/files/publications/SHEF%20FY%2012-20130322rev.pdf>.

**Trend #8: Funding for financing postsecondary education is inadequate to meet the need, increasing pressure to identify alternative revenue sources.** State-level cutbacks in financial aid are occurring at the same time as tuition and fees are increasing to make up for shortfalls in institutional revenues.

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** High

**Supporting Rationale:**

- State support across the nation dropped 7.6% in the 2012 fiscal year.
- In Illinois, the gap is widening between those who are eligible for grants and those who receive grant funding.

**Sources:**

- Society for College and University Planning, *Planning for Higher Education Journal*, 2012 & 2013
- Illinois Student Assistance Commission, Table 2.4c of the *2012 ISAC Data Book for Public 2-Year Institutions*

## Sender Districts

---

**Trend #9: Youth in district sender pipelines continue to decrease in number and increase in diversity.**

The proportion of Non-Hispanic White students is decreasing and enrollments in the early grades are declining which could have long term implications for Harper enrollments.

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** High

**Supporting Rationale:**

- There was almost a 1,200 student difference between kindergarten and senior level enrollments in the Harper region in 2013.
- As with the overall population, the numbers of Hispanic and Asian students are increasing in the schools.

**Sources:**

- Illinois State Board of Education, Report Card Data, Accessed Online 12/02/2013

**Trend #10: Performance in Harper's sender high school districts is better than average with increasing rates of college readiness.** The three Harper region high school districts are performing well compared to statewide averages.

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** Moderate

**Supporting Rationale:**

- PSAT test results and graduation and attendance rates in the high school districts are well above the state average.
- Dropout and truancy rates are well below the state average.

**Sources:**

- Illinois State Board of Education, Report Card Data, Accessed Online 12/02/2013

## Technology

---

**Trend #11: Higher education is implementing technology-centric pedagogical models.** Higher education continues to use teaching methodologies that use more technology in the classrooms.

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** High

**Supporting Rationale:**

- Massive Open Online Courses (MOOCs) present a challenge to students who are not disciplined enough to stick with the program.
- An estimated 30% of all enrollments is online, up from 10% in 2002.
- Faculty will be challenged to stay ahead of students in teaching students how to use technology in the classroom.
- Data security will increasingly become a liability for higher education.
- Flipped classrooms that post lectures and rote materials online are gaining in popularity.
- Student analytics.

**Sources:**

- Society for College and University Planning, *Planning for Higher Education Journal*, 2012 & 2013

## Sustainability

---

**Trend #12: The global political climate will increase pressures to conserve energy and focus on sustainability.** The rate of energy and natural resource consumption will continue to increase with the rapid growth in the middle class in developing countries, such as China and India.

**Likelihood that the Trend Will Continue Over the Next 3 to 5 Years:** Moderate

**Supporting Rationale:**

- Natural resources are becoming threatened as growing populations consume resources at an increasing pace.
- While 40% of American consumers claim they are interested in purchasing green products, only 4% actually follow through.

**Sources:**

- Society for College and University Planning, *Planning for Higher Education Journal*, 2012 & 2013

---

## *Introduction*

---

The environmental scan is intended to provide a baseline of information for Harper College's next strategic planning process to begin in 2014. Understanding the implications of the Great Recession and other relevant trends and dynamics at the local, regional, state, national and global levels will assist Harper in charting the best course of future action.

The nation has experienced dramatic change in the last five years, driven primarily by a global economic recession that began in 2008. While there are signs of improvement, the slow recovery has hampered families' ability to return their incomes to pre-recession levels. Unemployment rates, housing values, wages, and many other financial indicators suggest that the resources needed to pay for postsecondary education have been directly impacted as the residents rebuild lost savings and home equity. Other economic, demographic, workforce, technological, and political trends are important to identify and consider, as they all have implications for how postsecondary education responds to opportunities and challenges.

The scan provides an overview of the key economic, housing, population, workforce, technology, political and postsecondary education trends that are shaping the environment within which Harper College operates. Many of these trends have been identified by the Society for College and University Planning. Each section in this report provides available data for the Harper district and larger geographies for comparison purposes. Large tables and long lists of information are provided in the appendices to this scan.

---

## Economic Trends

---

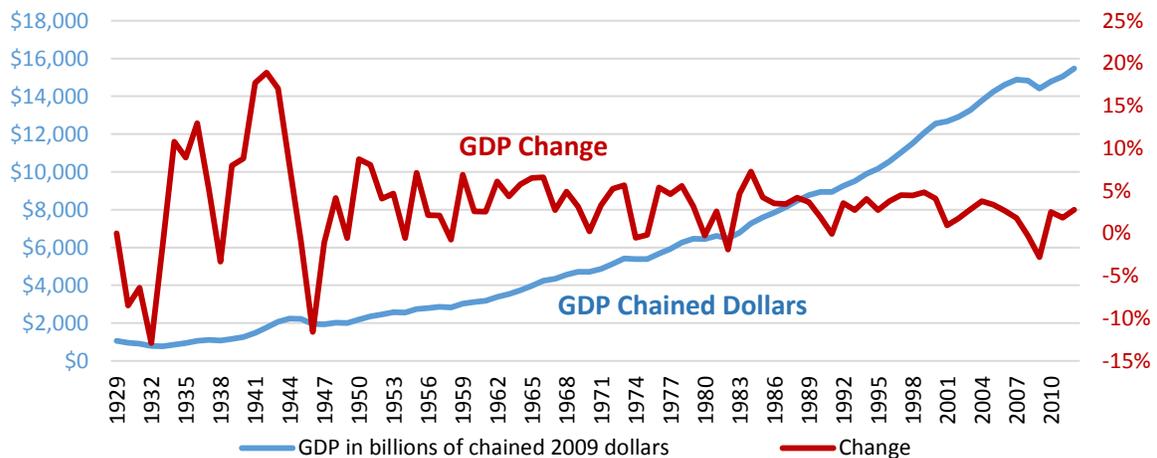

Economic forces have myriad implications for higher education. Federal and state budgets directly impact the funding that flows to postsecondary institutions, and the economy at all levels shapes employment and earning opportunities that translate to income available for college tuition.

### National Recession

The nation has been undergoing a slow recovery from a deep recession that began in 2008. Unemployment has hit record highs since the 1980s, and while the unemployment rate is slowly decreasing, the number of workers who are discouraged from seeking work has been on the rise. Many countries around the globe are experiencing economic malaise. Wall Street is claiming to be in recovery, but Main Street still struggles with the lack of employment, stagnant wages, and rising prices.

A recession is defined primarily by negative economic growth. As illustrated in Figure 1, the Great Recession began in 2008 as a large dip in the Gross Domestic Product (GDP). The red line represents the percent change over time, and when compared with the recession of 1980, the subsequent loss in 1982 was not as great as the 2008 recession. However, GDP has been increasing since 2009 indicating the economy is in recovery, albeit a slow one.

Figure 1: U.S. Gross Domestic Product

Source: Bureau of Economic Analysis, Gross Domestic Product in Billions of Chained 2009 Dollars

In response to the perfect storm of financial distress that included the pop of the housing bubble, mortgages going into default, declining home values, high unemployment, and lower consumer spending, there have been cutbacks across the board by state and federal agencies. High unemployment and foreclosure rates translated to a decrease in local spending, perpetuating a negative spiral as consumer confidence declined and household spending continued to decrease.

Total wages have not rebounded from the declines that began in 2001, thus pumping fewer dollars into the local economy, as seen in Figure 2.

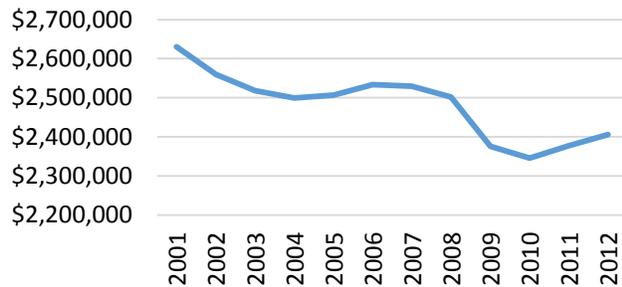

However, there is some good news. According to the Bureau of Labor Statistics, in the fourth quarter of 2012 “McHenry, Lake, and Cook Counties experienced the state's largest wage increases, ranking 7th, 28th, and 60th, respectively, among the nation's 328 largest counties.”<sup>1</sup> The next year will reveal the pace and sustainability of the economic recovery for the Harper region.

### Gasoline Prices

The price of gasoline impacts not just the cost of driving a car, but petroleum is used to transport goods and manufacture other goods. The rising price of gasoline causes all other prices to rise. Because the price of oil is set globally, the only component in local, state, and federal control is how much tax is applied.

In the last several years the average gas price in the region has continued to rise, along with the cost of utilities. There is no relief in sight according to the U.S. Department of Energy. The potential for state or local relief measures, including the reduction in taxation on pumped gas, is declining as the majority of the price increase has been the cost of crude oil itself. As seen in Figure 3, the average tax from 2000 to 2011 was 21%. In 2011 that same tax dropped to 11% of the total cost per gallon, but the cost per gallon increased by 55%. The federal gasoline tax is 18.4 cents per gallon, while Illinois tacks on an additional 19 cents per gallon – a rate that is among the lowest in the nation. Crude oil pricing is determined by a global market that continues to grow as China and India purchase more cars and demand more consumable goods. Therefore, the price we pay at the pump is a function of global supply and demand. This has

**Figure 2: Cook County Total Wages Paid**

<sup>1</sup> Bureau of Labor Statistics. Press Release. Accessed Online: <http://www.bls.gov/ro5/qcewil.htm>

direct implications for commuter students who may need to make fewer trips to campus or enroll in more online courses.

### Impact of Illinois Pensions

In fiscal year 2012, Illinois cut state agency budgets across the board in an effort to help fill the \$100 billion pension shortfall. An increase in state income and corporate tax rates have helped generate additional revenue (see Table 1), but these rates are set to expire in 2015 unless new legislation is passed.

The downgrading of Illinois' bond ratings (Table 2) will require the State to pay more in interest for its borrowing. Table 2 shows the current ratings for Illinois general and special obligation bonds. While credit agencies vary in their ratings, in general an AAA rating is considered prime with lesser ratings qualifying borrowers for high grade, upper medium grade, and lower medium grade interest rates. The situation is not unique to Illinois, as Standard & Poor's recently downgraded the creditworthiness of the U.S. government and other states have been downgraded. However, as debt payments increase, the availability of funds for other state priorities, such as education, will decrease. As a result, institutions of higher education are having to increase tuition and fees to cover the shortfall at a time when unemployment and high tax rates are reducing income available for education.

**Table 1: Illinois Individual Corporate Income Tax**

	Individual	Corporate
<b>2015</b>	3.75%	7.75%
<b>2011</b>	5.00%	9.50%

## Higher Education Funding

States fund higher education at varying levels. Illinois displayed the largest increase of all the states in total educational revenue per FTE (see Figure 4) between 2007 and 2012: a 15.6% increase compared to an average national decrease of 7.9%. However, much of the increase is for payments to shore up the pension fund and will not be used to provide educational services.

**Figure 4: Total Educational Revenue per FTE  
Percent Change by State, Fiscal 2007-2012**

**Note:** Dollars adjusted by 2012 HECA, Cost of Living Adjustment, and Enrollment Mix; total educational revenue excludes net tuition revenue used for capital debt service. Accessed online:

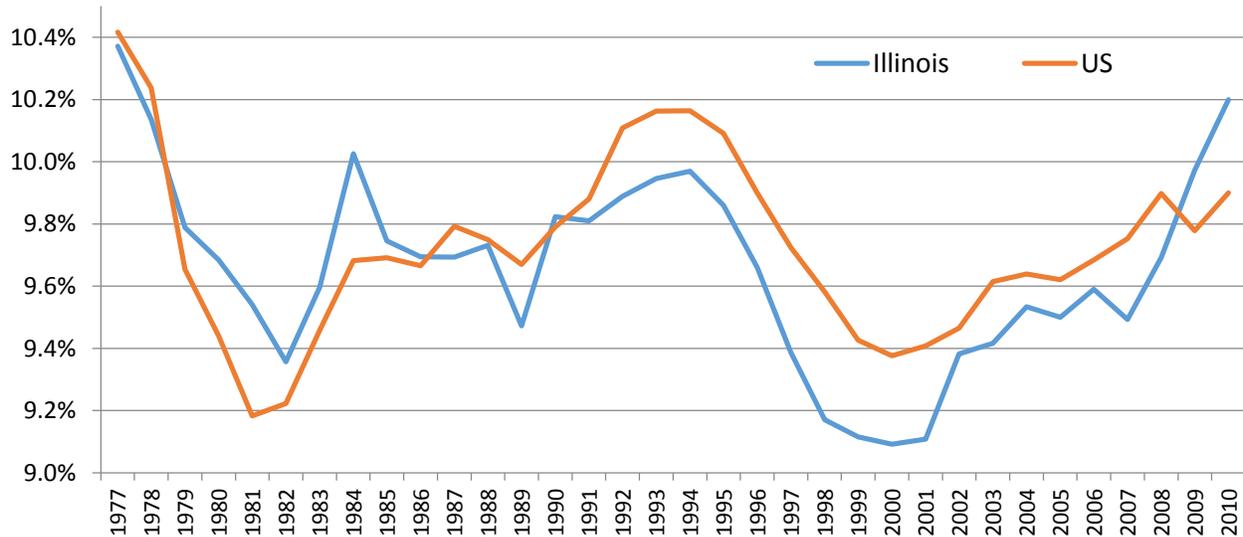

<http://www.sheeo.org/sites/default/files/publications/SHEF%20FY%2012-20130322rev.pdf>

**Source:** State Higher Education Executive Officers

Illinois is not the only state with pension troubles. The Government Accounting Standards Board (GASB) is recommending new rules to govern the funding of public pension systems and to apply standards to the recording of pension liability in the long term. The new measures will be effective on June 16, 2014 and will help avoid future pension underfunding. However, Illinois has a long way to go in order to make up for the underfunding over the last decades.

At a local level, the ability of families to pay for higher education continues to be a challenge. In recent years, Illinois' tax burden has exceeded that of the country as a whole and has reached levels not seen since 1978. High tax rates reduce the amount of discretionary funds available for families to use on such commodities as education (see Figure 5).

**Figure 5: State-Local Tax Burden (1977-2010)**

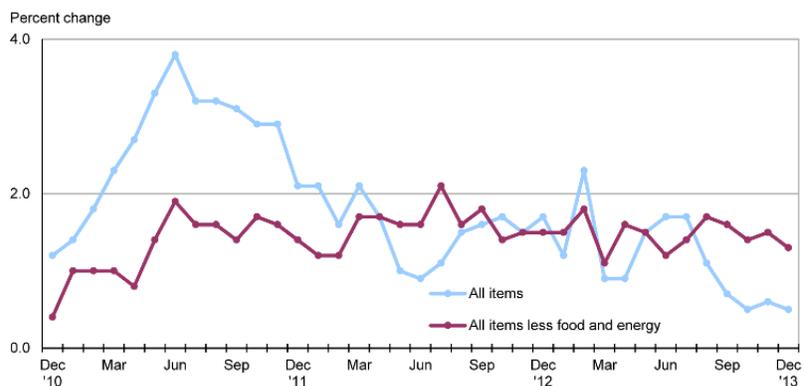

Source: Tax Foundation calculations based on data from the Bureau of Economic Analysis, the Census Bureau, the Council on State Taxation, the Travel Industry Association, Department of Energy, and others.

The Consumer Price Index (CPI) is a measure utilized by the Bureau of Labor Statistics to determine the buying power of the dollar across the country. The Metropolitan Area<sup>2</sup> is experiencing a return to levels from before December 2010. Figure 6 illustrates the changes in the CPI in the last three years. Because the gas price fluctuates greatly, there are two measures, one including the energy pricing and one without. The dark red line

indicates the price of a bundle of goods without consideration of energy costs and it is apparent the CPI is fairly stable. A stable CPI is better when wages are not increasing so that necessary consumables are affordable.

**Figure 6: CPI Percent Change for Chicago MSA**

## Economic Conclusion

At the end of 2013, economic indicators suggested that while the economy recovery was still fragile, there were unmistakable signs of improvement. Consumer spending, job growth, retail inventories, and overall economic growth all suggest that the economy was rebounding at the end of last year and is positioned for stronger growth in 2014. As pension reform legislation passed in late 2013 faces certain legal challenges, uncertainty about the state's pension funding gap lingers. Until fiscal certainty is restored to Illinois, the state's bond rating will not improve and scarce general revenues will be diverted to support debt payments. Families remain hard-pressed to find the resources to pay for basic needs, such as gasoline for commuting to work or school, and for college tuition.

---

## Housing Trends

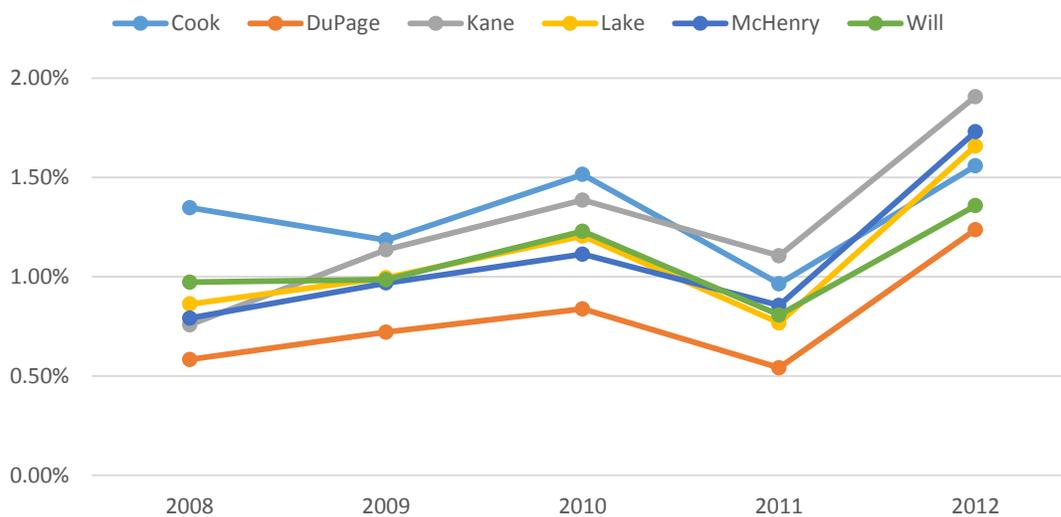

---

Healthy neighborhoods affect higher education in many ways. Safe and stable communities translate to higher property values, a principal source of education funding. Strong communities can also support healthy families that provide quality learning environments for students of all ages. Housing is a key indicator of neighborhood quality and is the main focus of this section. Since the housing crisis began in 2008, many homeowners have seen their housing values plummet and others have lost their homes altogether. This type of turnover can significantly increase the mobility of families and disrupt student learning, particularly in the K-12 sender schools within the Harper district.

### Foreclosures

Foreclosures are a crucial indicator of community well-being and the Chicago region has been hit hard. Counties in the Harper district all experienced dramatically increased foreclosure rates in 2010 and then another large increase in 2012, see Figure 7. Recent reports suggest that 2013 was a better year and the market may be returning to lower rates. Kane County is usually very low in comparison and is now experiencing the greatest increases.

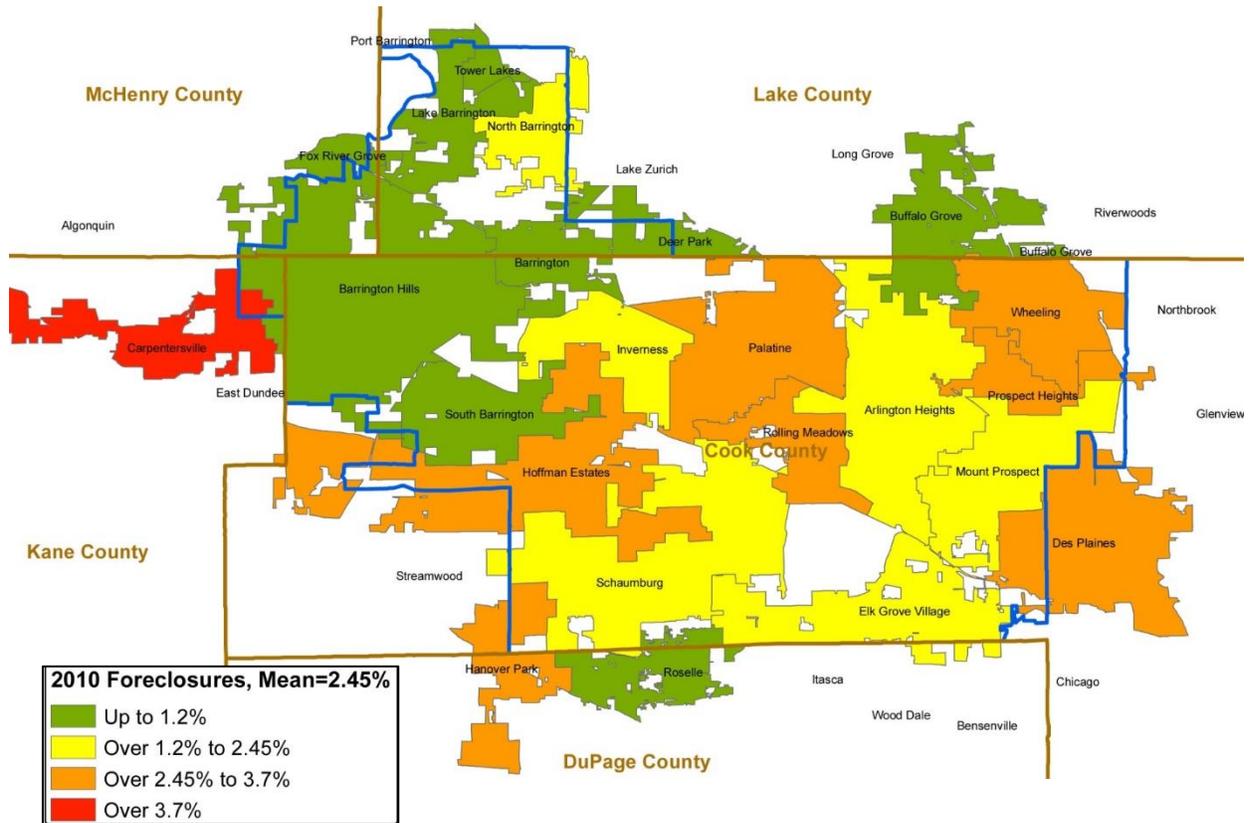

**Figure 7: Foreclosure Rate in Harper Region**

Source: Woodstock Institute, Foreclosure Filing and Auction Data, 2013

Carpentersville is the only municipality, primarily in Kane County, that intersects the Harper district and has a high foreclosure rate of 3.7%, the highest in the Harper district in 2012 (see Figure 8). Foreclosure rates provide insight into the ability of families to afford or even consider higher education for their children. High foreclosure rates often result in increased student mobility, a disruptive phenomenon that is challenging for students and teachers alike.

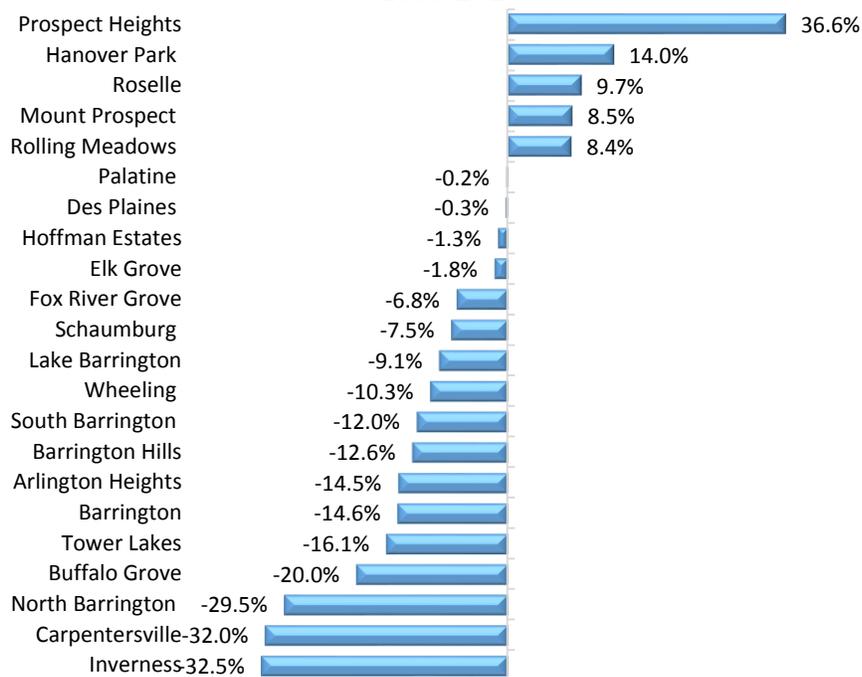

**Figure 8: Foreclosure Rate by Municipality in the Harper District**

### Home Values

Between 2008 and 2013, declines in perceived housing value occurred in a majority of communities within the Harper district (see Figure 9). Of the 22 municipalities that overlap the Harper district (Deer Park is excluded as the data are not available for 2008), only five reported an increase in housing values: Roselle, Prospect Heights, Rolling Meadows, Mount Prospect and Hanover Park. Prospect Heights rose by 36.6%, or from \$197,013 to \$269,111. Only one municipality, North Barrington, showed an increase in rental price from \$1,190 to \$1,571 which could be accounted for by a new upscale rental complex. All other municipalities reported decreases in value and rents being paid. South Barrington has the largest decrease in rental price of 40.6%, or \$2,000 to \$1,188. Inverness has the highest decrease in housing value of 32.5%, or \$828,186 to \$558,910.

Figure 9: Perception of Housing Value Change  
2008-2013

Source: EASI Analytics, 2008 & 2013

It is important to note that the perceived housing values are based on surveys of owners living in these units. However, the Illinois Realtor’s Association is seeing the same downward trend in home values by those sold. In the third quarter of 2008 the median year-to-date value of homes sold was \$244,900 and in 2013 the comparable figure is only \$179,000, a 36.8% loss<sup>3</sup> throughout the entire Chicagoland area.

Another important housing measure is the number of high interest loans<sup>4</sup> being approved. High interest

loans provided mortgages to those with less than stellar credit histories. Charging a higher interest rate is accepted practice in the hopes that the stability of homeownership would improve the homeowner’s financial situation, allowing for refinancing when lower interest rates were available. However, the housing market crashed due to the abuses of approving mortgage loans without checking creditworthiness, knowing in many cases that the buyer could not maintain the payments. Many of these originated mortgages were quickly bundled and sold to other banks who assumed they were vetted, when in fact they were not. Housing prices dropped, payments could not be maintained, and the notes these mortgages were written on were no longer of value.

The practice of subprime mortgaging is being monitored now, but it is too late to repair the damage already done. Throughout the nation, many homeowners found themselves with mortgages that were much higher than the value of their homes and, unable to afford their payments, went into foreclosure. Evidence of this in the Harper region is found in the decline in owner-occupied homes between 2007 and 2012 (see Table 3).

	Cook County	Lake County	McHenry County
<b>2007</b>	62.3%	78.7%	84.6%
<b>2012</b>	57.1%	74.6%	80.1%

Source: US Census Bureau, American Community Survey, 2007 & 2012

A recent study conducted by RealtyTrac in December 2013 reported that the Chicago-Naperville-Joliet metropolitan area is still struggling. The loan to value

<sup>3</sup> Illinois Realtor’s Association, Market Stats Reports for 2008 and 2013, Third quarter year-to-date median sales price of all sales in the Chicago PMSA.

<sup>4</sup> Woodstock Institute. Data Accessed Online: <http://www.woodstockinst.org/content/mortgage-purchase> on December 10, 2014

ratio (LTV) is 125% for approximately one-third of mortgaged properties. The majority of these properties tend to be on the south side or within Chicago city limits, but overall Illinois is ranked third in the nation for over-mortgaged properties after Nevada and Florida.<sup>5</sup>

The issuance of high interest, or subprime, mortgages have dropped dramatically in the Harper district from a high of 18.5% in 2007 to only 1% in 2011 as a result of stricter regulation on the creditworthiness of applicants. There has been substantial turnover in mortgage origination, whether initial mortgages or refinance, and the number of new loans has been cut almost in half since a high in 2009. The low interest rates should be attractive to buyers, but the demand has dramatically slowed due to the new and more restrictive credit requirements. The result is a buyers' market as there will be more homes available than buyers who qualify to purchase.

According to the Illinois Realtor's Association, a reduction in the number of homes on the market as foreclosures slow and low interest rates will improve housing sales. However, the lack of lower priced housing stock is causing many families to spend a larger proportion of their income on a mortgage reducing their discretionary funds. The Association predicts that foreclosures will "return to pre-bubble levels by August 2015"<sup>6</sup> in Illinois. The return will improve perceptions and stability to neighborhoods experiencing high volumes of vacancies and turnover.

The availability for new homeowners to purchase a home in the area is going to be more difficult due to the new restrictions. Foreclosures are slowing, which is a good sign. However, there are many homes on the market along with many others now owned by banks that are not being maintained contributing to the decline in home values, both perceived and in reality.

## Vacancies

Housing vacancies can be an indicator of neighborhood stress. The Harper region is showing some improvement from the 2008 housing bust, but more areas are increasing in the number of vacant homes as illustrated in Table 4. Northwest Cook County has a vacancy rate of 2.69% as almost three homes for every 100 are vacant. The high in the area is South Cook County at 6.55% and the lowest is McHenry County at 1.62%. The percent change in vacancies from 2011 to 2012 for the Northwest Cook County area increased by almost 4%. Of those homes, 58% have been long term vacancies.

<b>Table 4: Housing Trends by County</b>	<b>Vacancy Rate (2012)</b>	<b>Percent Change in Vacancies (2011-2012)</b>	<b>Percent Long Term Vacancies (2012)</b>	<b>Housing Units (2012)</b>	<b>Owner Occupied (2012)</b>
<b>McHenry County</b>	1.62	1.20	34.99	115,558	78.6
<b>DuPage County</b>	2.27	9.99	51.83	356,175	71.5

<b>South Cook County</b>	6.55	9.40	57.79	161,252	62.9

Source: The Woodstock Institute

## Housing Conclusion

The Harper district is weathering the housing crisis better than the larger Chicago metropolitan region. However, foreclosure rates have risen while housing values have declined. The combination has caused many families to move out of their homes and, without new buyers qualifying for mortgages, many homes are remaining vacant. While the foreclosure rates are slowing, it will take some time for vacant homes to be reoccupied and neighborhoods stabilized.

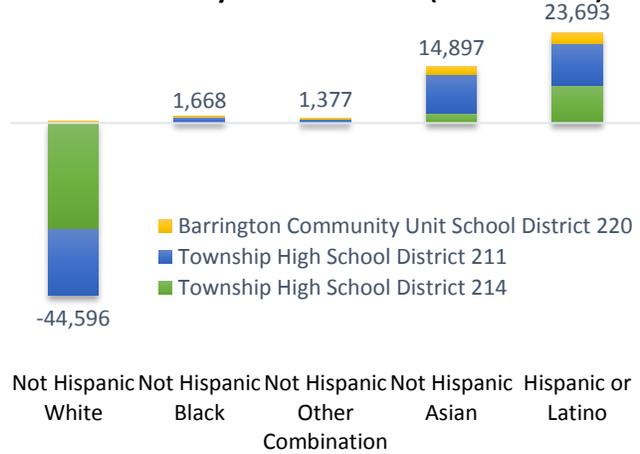

## Population Trends

The population of the Harper district is changing. Understanding these changes helps Harper anticipate growth or decline in student enrollments and to adjust educational programming to meet residents' needs. The population discussed in this section pertains to all residents or those who work within the district rather than Harper students specifically.

### Race-Ethnicity Changes

There is a more diverse population than ever before as Non-Hispanic Whites leave the area and are replaced by a mix of other races and ethnicities, most notably Asians and Hispanics as seen in Figure 10 and Table 5. The transformation is similar to the rest of the state. Whites have slightly increased in number statewide, but have slightly decreased in the proportion they represent, from 73.5% to 71.5%. Hispanics have increased in proportion of the total population, from 10.1% to 15.2%, and their numbers increased by 23,693 people or 4.4%. Asians have also increased statewide, but not as much as in the Harper district. The Harper district added almost 15,000 Non-Hispanic Asians. However, a significant development for the Harper district is the loss of Non-Hispanic Whites. There were almost 45,000 that moved out of the area; both Township High School districts saw significant decreases and only Barrington Consolidated School District saw a slight increase.

**Table 5: Change in Race & Ethnicity in Harper District Population (2000 – 2010)**

	Township High School District 214	Township High School District 211	Barrington Community Unit School District 220	Harper District	
Not Hispanic	White	-10.5% (-27,867)	-7.4% (-17,118)	1.0% (389)	-8.3% (44,596)
	Black	0.1% (167)	0.5% (1,233)	0.7% (268)	0.3% (1,668)
	Asian	0.9% (2,478)	4.5% (10,301)	5.6% (2,118)	2.8% (14,897)
	Other Race or Combination	0.1% (258)	0.3% (801)	0.8% (318)	0.3% (1,377)
Hispanic or Latino	3.7% (9,926)	4.7% (10,796)	7.8% (2,971)	4.4% (23,693)	

Source: US Census Bureau, 2000 & 2010 Decennial Census, Extracted using Alteryx Census Data Engine

High percentages of Hispanics reside in the Wheeling-Prospect Heights area, in the northeast along with the Elk Grove-Bensenville area surrounding O'Hare airport in the southeast section (see Figure 11). There is also a high percentage on the far west side in Carpentersville and part of Barrington Hills. Along I-90 there are higher concentrations, with many of these areas close to industrial and commercial properties. According to the Society for College and University Planning in 2013, "Fifty-three percent of U.S. preschool students, four years old and under, are Hispanic; of college students, 12 percent are Hispanic. In 2008, it was estimated that eight percent of the births in the US were to parents who did not have legal status." These trends are anticipated to continue.

**Figure 11: Hispanic Population Percentages**

### Languages & Foreign Born

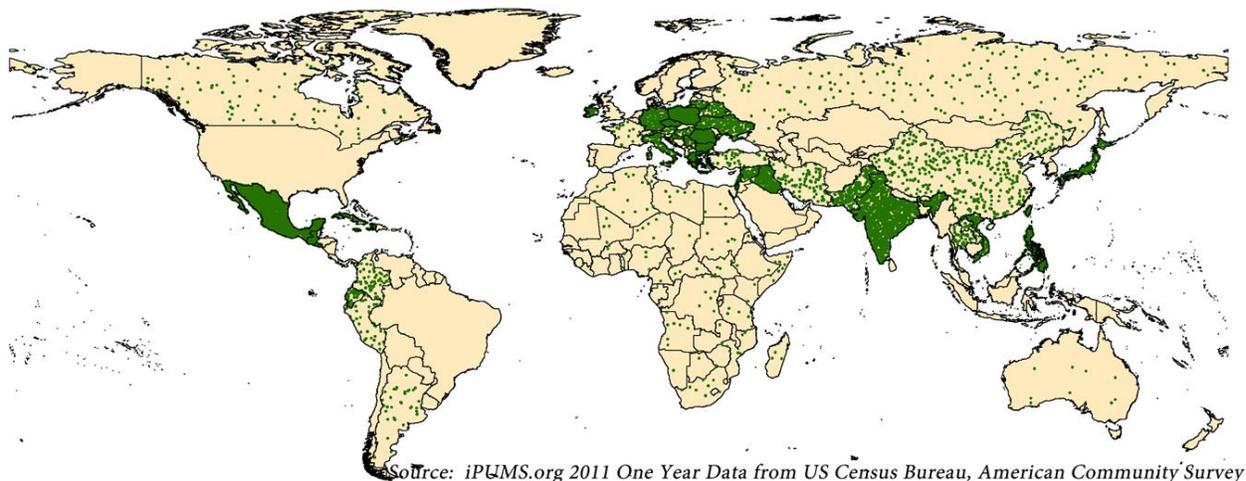

English language acquisition can be a challenge for those needing to continue their education. In the Harper region those who do not speak English at all or not well remained stable at 6%. The languages that are spoken vary, but the most common is Spanish (13.6%), Hindi (3.6%), and Polish (3.2%) as illustrated in Table 6 (Ruggles, et al., 2010). Forty-eight different languages were reported in 2011 for the Harper district reflecting the diverse origins of residents in the region. Immigrants are an important source of small business start-ups and contribute to local economic development.

Table 6: Primary Languages in the Harper Region	2008		2011	
	Number	Percent	Number	Percent
English	526,903	62.6%	509,665	60.7%
Spanish	104,311	12.4%	113,773	13.6%
Polish	28,457	3.4%	27,038	3.2%
Hindi and related	26,589	3.2%	30,391	3.6%
Russian	14,521	1.7%	14,052	1.7%
Korean	12,088	1.4%	12,805	1.5%

Source: US Census Bureau, American Community Survey, 2008 & 2011 1 Year Estimates

Figure 12 is a map of Harper area residents and where they were born if not in the United States or territories. Each dot represents 25 people. The largest concentrations of foreign-born come from Mexico (19.8%), India (12.6%) and Poland (11.6%). When aggregating by country, almost 40% are coming from Asia. First generation immigrants make up an estimated 25.6% of Harper area residents, much greater than the statewide proportion of 14.3% (Ruggles, et al., 2010). This is not surprising given that the vast majority of immigrants live in highly urbanized areas, such as the Harper region (Corbett, 2011).

**Figure 12: Harper College Foreign Born Population Origination**

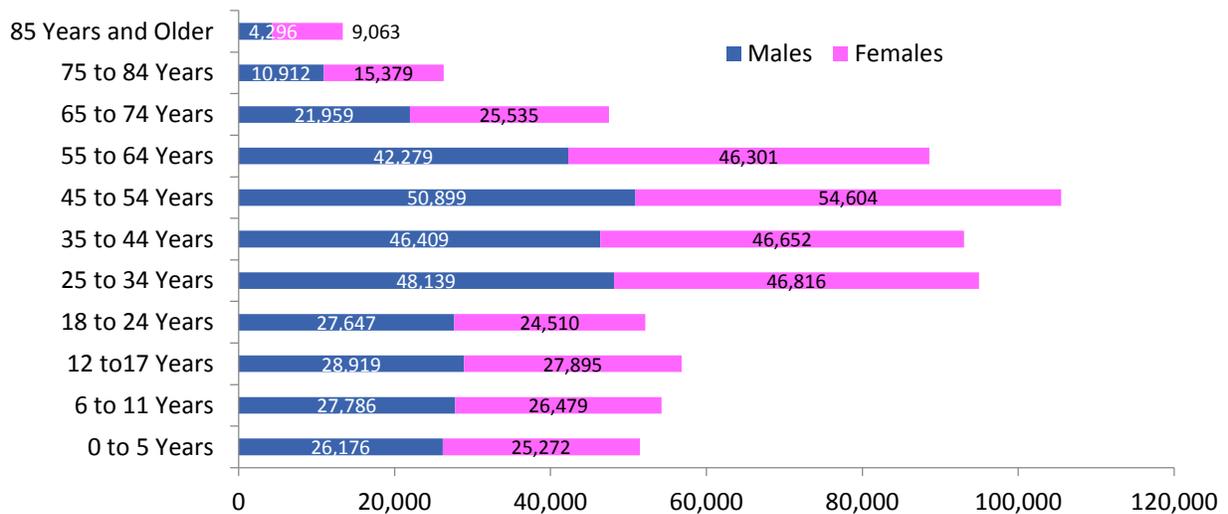

College plays a unique role in exposing students to new ideas and perspectives through engagement in a racially diverse student body. When people from segregated backgrounds are introduced to diverse environments they change, a process often leading to intellectual and socio-emotional growth (Gurin, Dey, Gurin, & Hurtado, 2004). Diversity on higher educational campuses can enrich the educational experience and produce a work force better able to thrive in a global economy. The challenge for Harper and other institutions serving diversifying populations is to attract a student body and faculty that mirrors their regions.

### Age Composition

The movement of Baby Boomers through the workforce is creating both challenges and opportunities for employers, younger workers, the health care and social security systems, and the Boomers themselves. The Baby Boomer generation is the name given to those born between 1946 and 1964, now aged 49 through 67. As many move into retirement or decide to launch a new career, they take with them considerable skills and institutional knowledge that are difficult to replace. Other Baby Boomers, whose retirement savings were decimated by the Great Recession or who haven't the resources to retire, are remaining in the workforce and limiting access to employment opportunities by younger generations.

Below is a breakdown of Harper district residents by age (Figure 13). The Baby Boomers dominate the distribution, followed closely by their children, the “Echo Boomers”. However, in sharp contrast are the much smaller numbers of residents 24 and younger who will be expected to fill the positions vacated by older workers. Another challenge is the impending plunge in workers supporting a large and growing group of retirees. The retirement security of Baby Boomers retirees may need to be shored up with additional funding through Medicare, Medicaid and Social Security, three programs already experiencing funding difficulties (Rowett, 2013).

**Figure 13: Age Groups of Residential Population in the Harper Region - 2012**

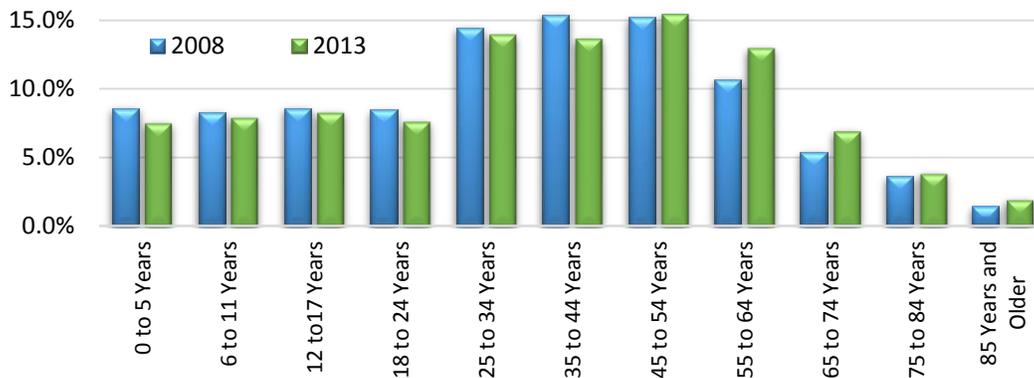

Source: Easi Analytics, Inc., 2012

Baby Boomers represent a significant and growing market for higher education. Many will need to seek professional development in their present careers to remain competitive. Others that have been edged out due to technological advances or shrinking of the workforce in various industries will need to be retrained for new careers to remain in the workforce. The education and training needs and preferences of mature workers, including the Traditionalists (born before 1945) and the Boomers, are often different than those of young and mid-skill workers, such as the Generation X’ers (born between 1965 and 1980) and the Millennials (born between 1981 and 1999). Each generation has its own ideas, behaviors, expectations and motivators that should be taken into account when developing programming. These differences may be reflected in individual communication and learning styles, comfort with technology, and the need for scheduling flexibility.

Baby Boomers were born from 1946 through 1964 after World War II causing a larger than normal birth rate during that period. Now those Baby Boomers are reaching retirement age (49 through 68 years of age) bringing to light the pension and Medicare funding issues. The Baby Boomer generation can be seen when looking at the population age cohorts over time in the Harper region. From 2008 to 2013, each group has decreased in both percentage and absolute change in the Harper region. It is not until 45 years of age that there is an increase in numbers and proportion (Figure 14).

**Figure 14: Population Age Cohorts**

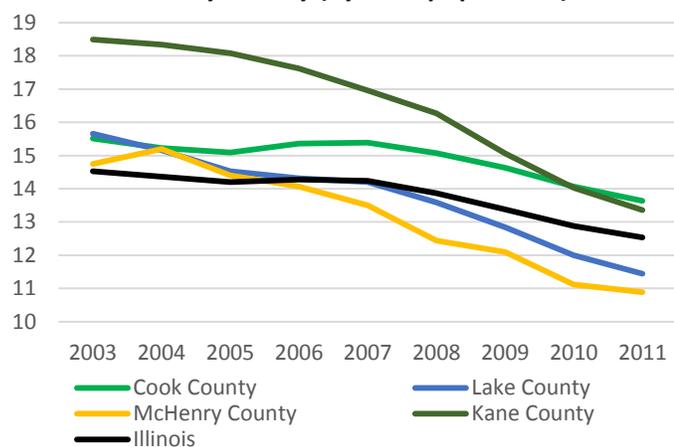

Source: Easi Analytics, 2008 & 2013

The Great Recession, the erosion in property values, and loss of retirement savings has caused many mature workers to postpone retirement and remain in the workforce that would have historically been made available for those entering the workforce. Internships for Harper students will be more difficult to secure while employment after graduation will continue to be a challenge.

Birth rates across the developing world have been on the decline since 2007 (Figure 15). Prior to 2007 there were some decreases primarily due to couples waiting to have children. However, since 2007 the economy is playing a larger role. Immigration has increased to help fill that gap. According to SCUP, some states are taking measures to further enhance immigration to shore up the younger age groups. In-state tuition is being offered in some cases and others have changed admissions standards that weight minority or legacy status to those based on socioeconomic status.<sup>7</sup> These are some considerations for Harper College if the younger age groups remain low in numbers.

**Figure 15: Birth Rates in the Harper Region by County (by total population)**

Source: United States Department of Health and Human Services (US DHHS), Centers for Disease Control and Prevention (CDC), National Center for Health Statistics (NCHS), Division of Vital Statistics, Natality public-use data on CDC WONDER Online Database, years 2003-2006 published March 2009, and years 2007-2011 published November 2013.

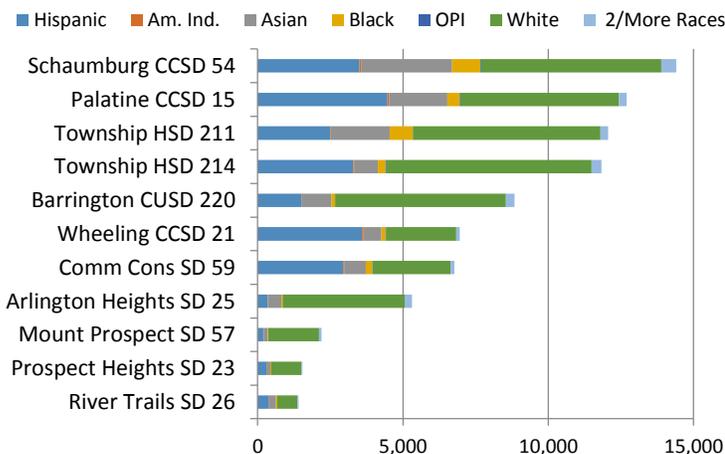

<sup>7</sup> Society for College and University Planning, *Planning for Higher Education Journal*, 2012

The same phenomenon is occurring in Lake and McHenry counties as they experience greater declines in birth rates than the State overall. Enrollments in Pre-K and kindergarten are already decreasing in the Harper district, suggesting that school districts may need to invest in cohort-based population projections and scenario development in the future. These types of studies take birth rates, in- and out-migration, household formations, and other population statistics into account to generate very detailed student projections. This information can enhance decision-making for future capital projects and planning. The long term implications for the Harper district may be fewer high school students applying to Harper College over the next 10-12 years.

### Elementary and Primary Students

The Harper district includes all or part of 11 districts, two of which are high school districts. The largest district is Schaumburg Community Consolidated District #54 with an enrollment of 14,409 students in 2014. The River Trails School District #26 is the smallest with 1,410 students. Districts are becoming more diverse with increases in Hispanic and Asian populations (see Figure 16). The 11 districts total 84,022 students in public schools.

**Figure 16: Public School Enrollments by Race-2014**

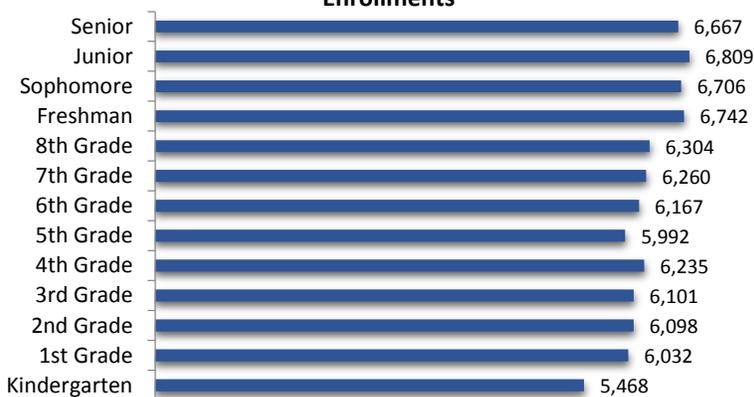

Source: Illinois State Board of Education, Fall Enrollment Counts 2014

Since 2011 there have been several changes in the schools within the districts. Three elementary schools were closed in the Schaumburg school district: Douglas MacArthur (K-6), Edwin Aldrin (PK-6) and Herbert Hoover (K-6). Nine new elementary schools have opened: one each in Palatine CCSD #15, Wheeling CCSD #21, and Barrington CUSD #220; two schools in Township HSD #211; and four new schools in Township HSD #214. A total of 123 schools are operating in these overlapping districts.

As was discussed previously in connection with Baby Boomers, the younger age cohorts in the Harper district are much smaller than those between 25 and 64 years old. As a result, enrollments in schools in the Harper district are on the decline (see Figure 17), a trend which is occurring across the nation. Fall enrollments show a decrease of 564 in kindergarten registrations over the previous

**Figure 17: Harper District Public School 2013-14 Enrollments**

Source: Illinois State Board of Education, Fall Enrollment Counts, 2013-14

year. There is approximately a 1,200 student difference between this year’s seniors and kindergarten registrations.

### High School Student Performance

Despite economic stresses that may impact the community, family, and individual, students attending the sender high school districts to Harper College have performed well above the statewide average. The Barrington district has had marked success in achieving high percentages of students who met or exceeded the national benchmarks. Although township districts 211 and 214 have consistently scored lower than Barrington, both districts are well above the statewide percentages and all have seen significant upticks in Prairie State Achievement Exam (PSAE) reading scores (see Figure 18). The three high school districts are preparing a greater proportion of their students for college than most Illinois schools.

**Figure 18: Harper Public High School District Performance**

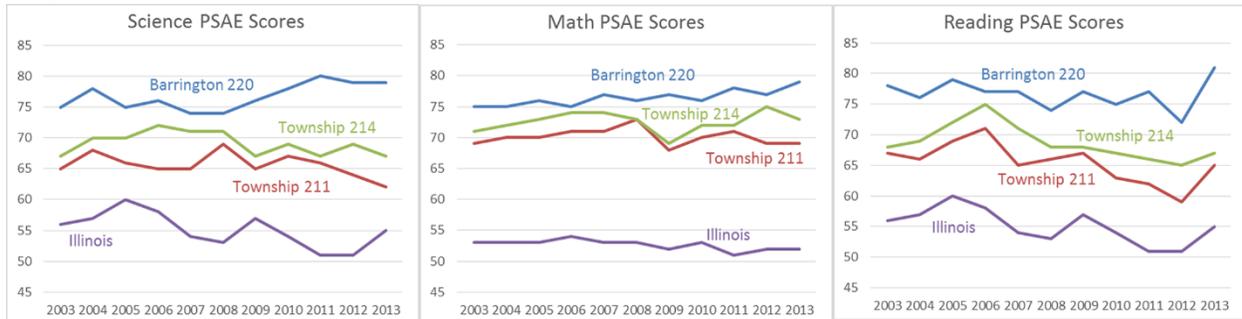

Table 7 shows indicators associated with graduation rates for the 12 high schools in the Harper district along with the statewide figures. Harper district schools are performing significantly better than the statewide average in dropout, truancy, and overall graduation rates.

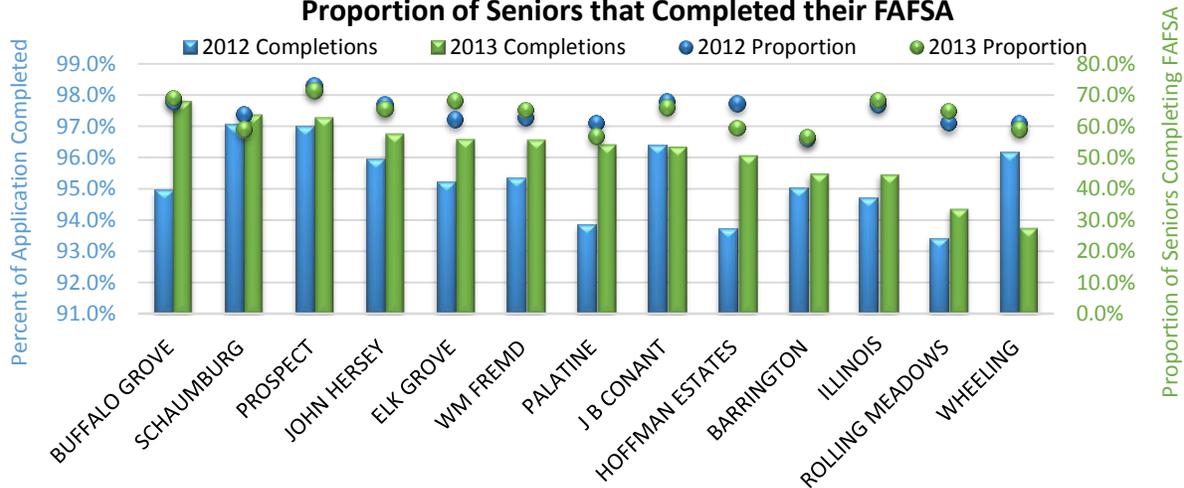

There has been a push from the national level to increase the number of students who begin and complete the Free Application for Federal Student Aid (FAFSA) application while in high school. Eight of the high schools in the Harper district have improved their FAFSA completion rates from 2012 to 2013, with only two remaining below the statewide average. Another measure of FAFSA completions is the percentage of all enrolled seniors that completed the FAFSA. Figure 19

<b>Table 7: High School Indicators</b>	<b>Dropout Rate</b>	<b>Truancy Rate</b>	<b>Mobility Rate</b>	<b>Attendance Rate</b>	<b>Grad Rate</b>
Wm Fremd High School	0.4	0.7	3.0	95.8	96.6
Barrington High School	0.3	0.7	2.7	95.7	95.7
J B Conant High School	0.5	0.4	4.3	95.4	95.0
Hoffman Estates High School	0.8	1.1	6.5	94.7	93.5
Prospect High School	1.1	2.2	4.7	94.1	92.9

<b>State</b>	<b>2.4</b>	<b>9.8</b>	<b>12.8</b>	<b>94.2</b>	<b>83.2</b>

Source: Illinois State Board of Education, Report Card Data, Accessed Online 12/02/2013

provides FAFSA completion data for all 12 high schools in the Harper district and the State of Illinois. All but one high school improved their percentage of FAFSA applications that were begun and completed, while there were more schools that saw increases rather than decreases in the percentage of seniors that completed the FAFSA. While many factors are involved in the decision to attend college, there is a strong correlation between FAFSA completion and college enrollment. Financial aid is becoming even more important as the cost of college continues to increase.<sup>8</sup>

**Figure 19: 2012 to 2013 Percent of FAFSA Applications Completed and Proportion of Seniors that Completed their FAFSA**

Source: Illinois State Board of Education, Illinois Report Card Data, 2012 & 2013

### Low Income Students in Primary and Secondary Schools

In the Harper district, all three sender high school districts have seen increases in the numbers of low income students, with High School District 211 having the highest percentage at almost 30%. The trend is not unique to the Harper region as the economy is impacting schools across the country. As a comparison, the current statewide percentage of low income students is much higher at 50%.

This increase in low income students reflects a larger phenomenon of growing suburban poverty that is characteristic of Chicago and many other American urban centers. A tipping point has occurred as a result of a struggling economy, shifts in affordable housing and jobs, immigration, and population dynamics. As a result, between 2000 and 2010 the suburbs in the Chicago metropolitan area witnessed an increase in poor residents from 39% to 76%, compared with an increase of only 10% in the region’s urban hubs. By 2010, a majority of the Chicago region’s poor lived in the suburbs.<sup>9</sup>

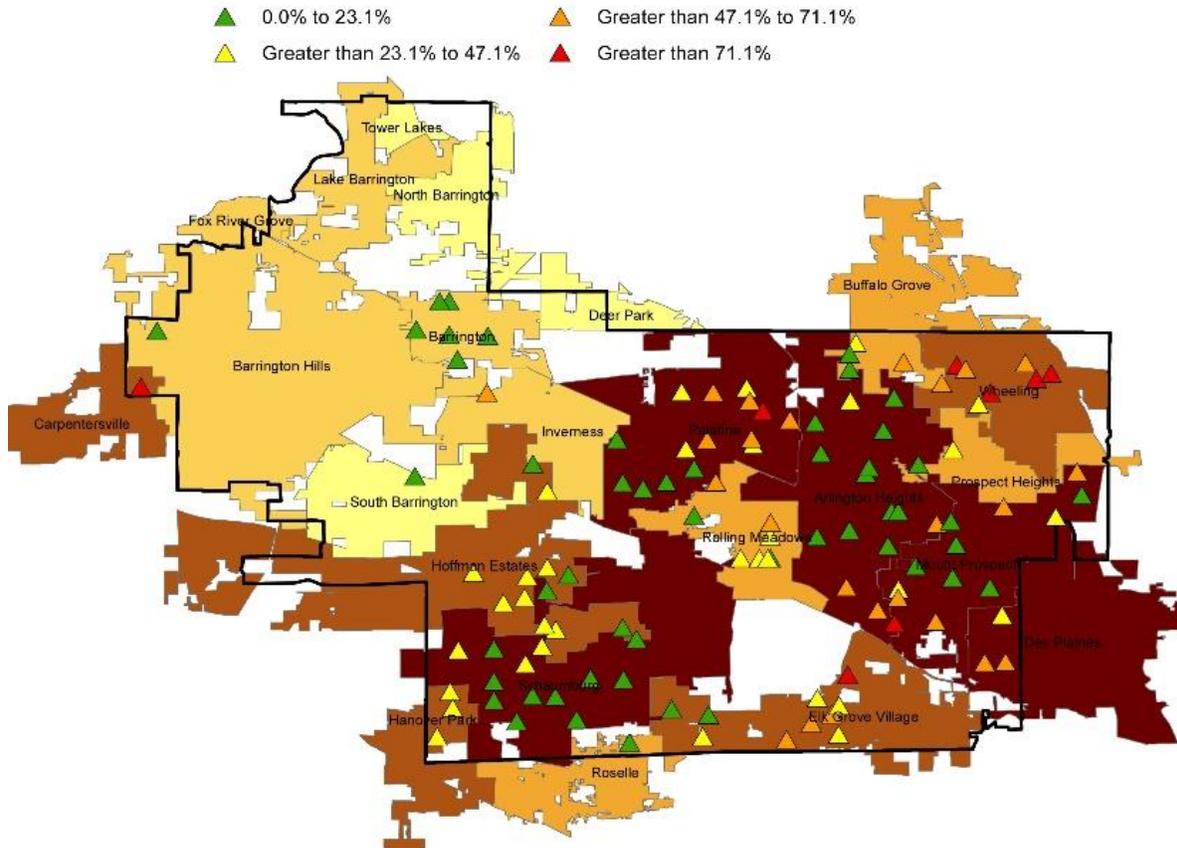

<sup>8</sup> “FAFSA Completion by High School.” Federal Student Aid, U.S. Department of Education.

<http://studentaid.ed.gov/about/data-center/student/application-volume/fafsa-completion-high-school>

Figure 20 shows each school within the Harper district and the percentage of low income students as measured by those who qualify for free or reduced lunch. According to the fall 2013 enrollment counts, there were 31 schools in the Harper district with percentages of low income students that were higher than the statewide average of 49.9%. Ninety-five schools fell below the state average according to the 2013 fall enrollments. The full listing is included in Appendix B.

**Figure 20: Low Income Student Percentages by School in Harper District - 2013**

### Student Retention

Graduation rates have become a standard measure of educational performance at all levels. After decreasing at one-third of four-year colleges between 2003 and 2008, graduation rates have become a major focus at the postsecondary level. Improving graduation rates requires attention to student persistence and retention, both of which are cornerstones for increasing the rate at which students complete certificates and degrees. SCUP has highlighted recent research that sheds light on various ideas of student retention with mixed results. These include:

- Providing low-income parents ‘pay for performance’ (i.e., based on grades earned, unrestricted funds could be garnered) in community colleges in Ohio increased the number of credits earned, although it appeared to have no effect on retention.
- A study in Wisconsin, using random assignment of additional need-based financial aid for Pell Grant recipients in 13 public universities, found that it increased persistence for students who were most likely to leave, while those who were already most likely to persist exhibited no effects of the additional cash transfer.

- Two separate studies of community college students reinforced the importance of engaging students in their first year with a defined program of study or concentration to increase persistence and completion.
- A recent study indicates that, unlike earlier research, there is no statistical difference in the likelihood of graduation within six years between ‘rising juniors’ and community college transfer students.
- Completion may be higher than most standard reports show. A recent report from the National Student Clearinghouse which tracks students across institutions indicated that 75% of all full-time students graduate within six years.
- The decision to withdraw from college may be based on a series of events that create ‘shocks’ to a student; if enough occur, the student withdraws.

### Population Conclusion

There have been many changes in the population in and surrounding the Harper district. Non-Hispanic Whites have been moving out and being replaced by primarily Hispanic or Latino residents and an increasing number of Asian residents. Those speaking Spanish have increased by 1.2%, or 9,462 additional people. The Harper region is also aging. Baby Boomers, born between 1946 and 1964, are now reaching retirement age and are hanging onto their jobs, leaving fewer entry-level employment opportunities. Birth rates are at an all-time low which is already being felt in the public schools as enrollment is down in kindergarten and first grade. It is unknown when the birth rate will track upwards again as many decisions to start or grow a family are dependent upon the economy. The performance of the public schools is much higher than the statewide average and the schools have been experiencing higher completion rates overall of the FAFSA, leading to a larger pool of college applications. Students qualifying for the free or reduced lunch program come from all communities in all of the schools. Carpentersville, Elk Grove, Wheeling, and Palatine have schools with the highest percentages of low income students, but the percentages are mixed across the Harper district. Researchers conclude that the academic achievement gap has widened with rising income inequality over the past four decades.<sup>10</sup>

Duncan (Eds) *Whither Opportunity? Rising Inequality and the Uncertain Life Chances of Low-Income Children*. New York: Russell Sage Foundation Press

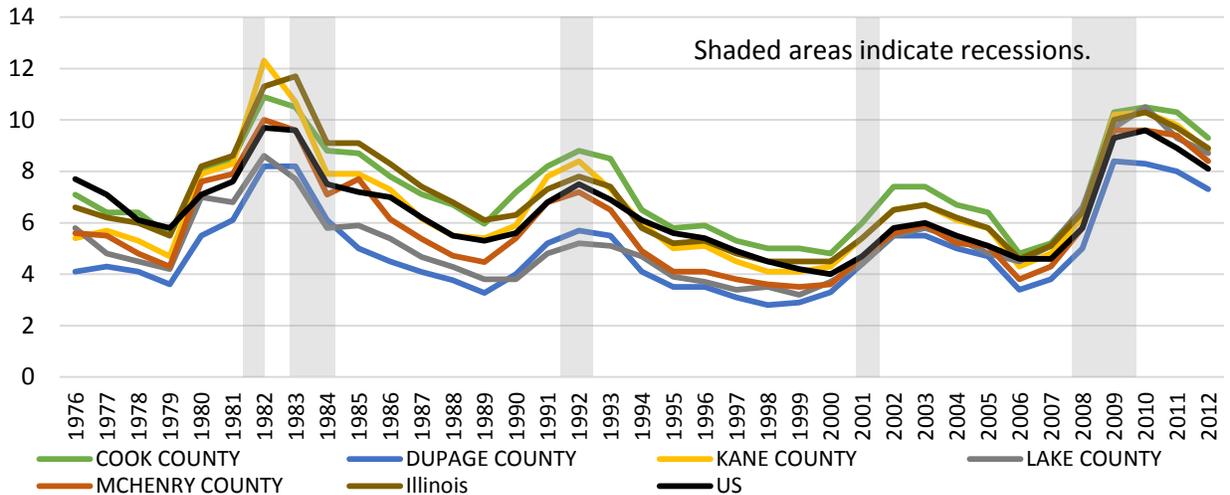

## Workforce Trends

There has been much change in the workforce since 2008. While the recession is over, unemployment has been lagging. The 2013 rate reflects an improvement in joblessness, but the numbers of discouraged workers are increasing and potentially canceling any gains. This section looks at unemployment trends, the necessary hourly wage to sustain a family, and household income trends in the municipalities within the Harper district.

### Unemployment

The Chicago metropolitan area had a November 2013 unemployment rate of 8.7%, an improvement over the seasonally adjusted October 2013 rate of 8.9%.<sup>11</sup> Figure 21 shows the fluctuations that have taken place over several decades that include two major and two lesser recessions. The 2008 recession resulted in across-the-board increases in annual unemployment, with some counties in the Harper region, such as DuPage and Lake, reaching record highs in unemployment. While these two counties have only a small portion of their territory overlapping the Harper district, the labor shed, or area from which Harper area employers draw their workers, includes a much wider region.

**Figure 21: Harper Area Average Annual Unemployment Rate**

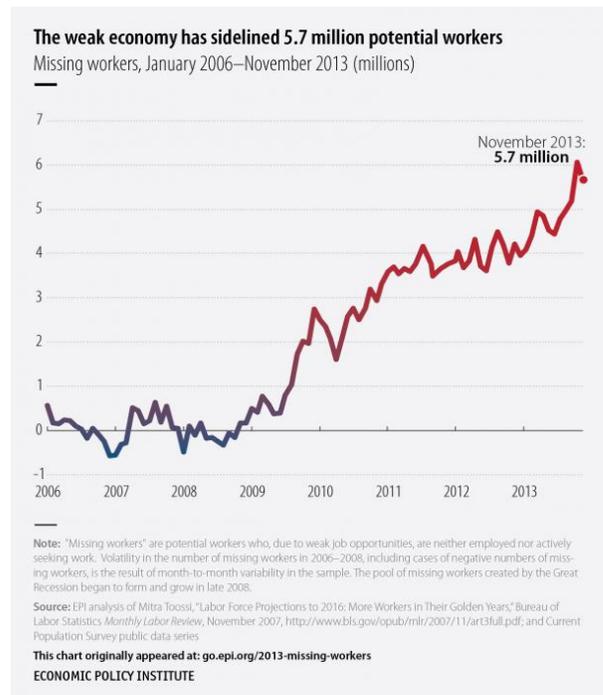

Source: Illinois Department of Employment Security, Local Area Unemployment Statistics, 2012

<sup>11</sup> Illinois Department of Employment Security, Revised 2008-2012 estimates published in March 2013.

It is important to note that unemployment rates exclude people who have unsuccessfully sought employment over a long period of time and have stopped looking: the “discouraged worker”. In a period of prolonged economic hardship the numbers of discouraged workers typically increase. The Economic Policy Institute measures discouraged workers by the employment to population ratio of those of working age. When there is a significant drop in the proportion working or seeking work, there is an increase in those who are considered discouraged. During a recession it is anticipated there would be an increase in discouraged workers due to the lack of available jobs. The Economic Policy Institute estimates there is the potential of 5.7 million workers that have given up on searching for a job, which is a significant increase since 2009 as seen in Figure 22.

**Figure 22: Discouraged Workers**

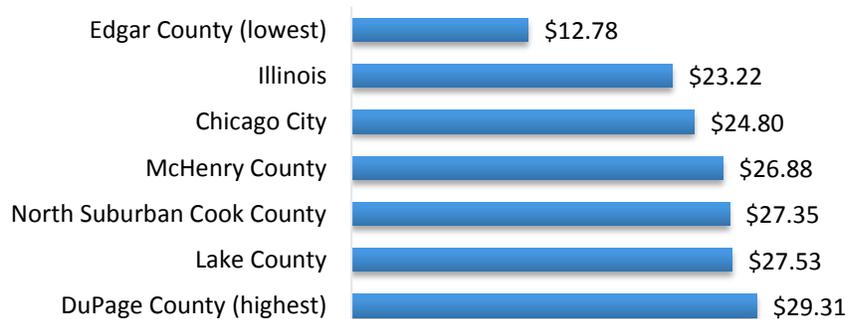

## Wages

A national discussion is taking place around whether to raise the minimum wage. Illinois currently has one of the highest minimum wages in the country at \$8.25, 14% higher than the national rate of \$7.25 that took effect in July 2009. Supporters argue that the minimum wage would have to be increased significantly to reflect a sustainable wage.

As an example, the Heartland Alliance publishes a self-sufficiency standard by county that would be necessary for a single parent to support a preschooler and a school-age child (see Figure 23). “Typical” hourly wages by county vary due to the difference in the cost of living. However, North Suburban Cook is one of the highest in the state at \$27.35 per hour.

One indication that wage levels are inadequate to support families is provided by the percentages of workers by occupation who rely on food stamps to supplement their incomes. For example, 4.9% of all retail salespersons receive food stamps as do 10.3% of all janitors (see Appendix C for a complete listing). Many of the occupations with the highest percentages of food stamp recipients are in the service sector which includes many of the low wage, low skill jobs that support our economy.

**Figure 23: Hourly Wage Needed to Support a Single Parent with a Preschooler and a School-Age Child**

Source: The Heartland Alliance, Illinois Self-Sufficiency Report, Accessed Online 01-30-2014, <http://www.heartlandalliance.org/research/research-illinois-self-sufficiency-standard/reports-and-fact-sheets/local-fact-sheets.html>

## Household Income

Households in the Harper district have seen their incomes erode since the onset of the Great Recession. Table 8 presents the change in inflation-adjusted median household income for all communities in the Harper district between 2008 and 2013. Only Fox River Grove and Roselle displayed an increase during this period. Incomes in every other community saw decreases that ranged from 1.8% to 39.2%. In general, with the exception of Barrington, communities with the highest median incomes experienced the largest decreases.

**Table 8:**

<b>Median Household Income</b>	<b>2008 Median HH Income</b>	<b>2008 in 2013 Dollars</b>	<b>2013 Median HH Income</b>	<b>Numeric Change</b>	<b>Percent Change</b>
<i>Fox River Grove</i>	\$78,441	\$84,716	\$97,821	\$13,105	15.5%
<i>Roselle</i>	\$78,656	\$84,948	\$86,342	\$1,394	1.6%
<i>Barrington</i>	\$105,112	\$113,521	\$111,478	\$2,043	-1.8%
<i>Des Plaines</i>	\$65,032	\$70,235	\$68,503	\$-1,732	-2.5%
<i>Mount Prospect</i>	\$70,129	\$75,739	\$73,819	\$-1,920	-2.5%
<i>Arlington Heights</i>	\$80,224	\$86,642	\$83,869	\$-2,773	-3.2%
<i>Hanover Park</i>	\$70,995	\$76,675	\$73,864	\$-2,811	-3.7%
<i>Hoffman Estates</i>	\$80,520	\$86,962	\$80,175	\$-6,787	-7.8%
<i>Palatine</i>	\$78,360	\$84,629	\$77,476	\$-7,153	-8.5%
<i>Schaumburg</i>	\$74,522	\$80,484	\$73,379	\$-7,105	-8.8%
<i>Prospect Heights</i>	\$59,398	\$64,150	\$58,376	\$-5,774	-9.0%
<i>Rolling Meadows</i>	\$70,220	\$75,838	\$68,665	\$-7,173	-9.5%
<i>Lake Barrington</i>	\$118,750	\$128,250	\$113,934	\$-14,316	-11.2%
<i>Elk Grove Village</i>	\$76,206	\$82,302	\$72,597	\$-9,705	-11.8%
<i>Buffalo Grove</i>	\$102,647	\$110,859	\$94,493	\$-16,366	-14.8%
<i>Tower Lakes</i>	\$156,481	\$168,999	\$143,750	\$-25,249	-14.9%
<i>Wheeling</i>	\$69,768	\$75,349	\$63,746	\$-11,603	-15.4%
<i>Carpentersville</i>	\$70,901	\$76,573	\$64,429	\$-12,144	-15.9%
<i>North Barrington</i>	\$162,842	\$175,869	\$139,087	\$-36,782	-20.9%
<i>Inverness</i>	\$153,892	\$166,203	\$128,802	\$-37,401	-22.5%
<i>South Barrington</i>	\$237,435	\$256,430	\$160,736	\$-95,694	-37.3%
<i>Barrington Hills</i>	\$175,307	\$189,332	\$115,203	\$-74,129	-39.2%

## Workforce Trends Conclusion

Despite signs of economic recovery, unemployment rates remain high as employers are wary of rehiring laid-off workers and many others are unable to find workers with the needed skills and qualifications. Prolonged unemployment is straining the nation's social safety net and is deferring achievement of the American Dream for many families. The available jobs for graduating Harper students will be a challenge as those already in the workforce that are eligible for retirement continue to hang onto their jobs.

---

## Technology Trends

---

There is no question that online learning is changing the learning landscape and fostering a competitive environment that is vastly different than the public education model. The University of Phoenix has bricks-and-mortar facilities in all 50 states and is now the largest higher education provider in the U.S. Convenience, self-paced learning, and lower cost are features that make these models attractive to working adults, people located in more remote areas, individuals with limited financial resources, and persons with disabilities. However, the hoped-for improvements in efficiency and effectiveness that were predicted to arise from increased technology have not yet materialized in postsecondary education. SCUP observed that the online model only works for those who are disciplined enough to follow through or those seeking personal development. Further, the personal interaction and connections made during face-to-face learning experiences are emerging as important components of effective learning. As a result, Udacity and Coursera are changing their educational models to include in-person instruction – a model of blended learning at which community colleges and other postsecondary institutions excel. By contrast, the learning-related return on investment for massive open online learning courses (MOOCs) has yet to be determined.<sup>12</sup>

Another emerging technology-based teaching and learning strategy is “flipped classrooms” wherein lectures and rote materials are posted online for students to access at their own pace while in-class time is used for interactive collaborative activities. According to a 2012 survey conducted by CDW-G of high school and college students, faculty, and IT professionals, just under one-half of faculty reported they are transforming their teaching methods away from the traditional lecture. Students reported their preference for hands-on, independent study, distance or virtual learning and individual tutoring as opposed to the traditional lecture model<sup>13</sup>. Community colleges offer students opportunities for real-time, face-to-face interaction with peers to broaden knowledge and gain social skills – features that are not available through MOOCs and providers on correspondence-type online-only instruction.

SCUP estimates that current enrollments in online courses represent 30% of all enrollments, up from only 10% in 2002, and reports that the global e-learning market is predicted to reach \$107 billion by 2015. However, the future of for-profit educational providers is uncertain. On one hand, a collaboration between the Saylor Foundation, which maintains a catalog of free, online college courses, and Straighterline, a for-profit, online course-provider, will allow students to take the free course and then enroll and take the exam via Straighterline for American Council on Education (ACE) credit. George Mason University and Northern Virginia Community College then offer an easy transfer of credit. In a similar vein, the ACE is working with Coursera to determine if a pilot group of MOOCs are eligible for credit through ACE. However, Bloomberg Business News reported that the University of Phoenix is under scrutiny from the Higher Learning Commission, even as its earnings drop with its stock price.

---

<sup>12</sup> Westervelt, Eric. The Online Education Revolution Drifts Off Course. National Public Radio. December 31, 2013. Accessed online: <http://www.npr.org/2013/12/31/258420151/the-online-education-revolution-drifts-off-course>.

<sup>13</sup> CDW-G, CDW Newsroom, Power Point Presentation, June 26, 2012, Accessed Online 01/31/2014: <http://www.cdwnewsroom.com/wp-content/uploads/2013/08/CDW-G-Learn-Now-Lecture-Later-062612.pdf>

As the e-learning market expands, increasingly we'll see successful providers, for-profit and non-profit alike, focusing on using data to personalize learning and on offering credit for prior experience/learning. Community colleges like Harper will need to clarify and market their competitive advantage, because increases in the cost of attending a community college are associated with a higher percentage of students choosing to enroll in a for-profit. When tuition increases from \$1,000 to \$1,400, students are one percent more likely to enroll in a for-profit school, even though for-profits generally charge higher tuition.

One potential strategic advantage is the capacity that community colleges offer in postsecondary certificates. The U.S. Government Accounting Office reports that for-profit school students had higher graduation rates for certificate programs, equivalent rates for associate degrees, and lower rates for bachelor's degrees. The postsecondary certificate has become a cost-effective tool for increasing postsecondary educational attainment and gainful employment. Certificates vary widely in their benefits, but two out of every three workers who have a certificate and a college degree earned the certificate first, an indication that certificates can serve as a stepping stone on the way to a college degree.<sup>14</sup>

Educause conducted a survey of undergraduates to gain insight into how they perceive technology use in the classroom. Among their main findings were that the blended-learning environments best support how the students learn and a belief that their academic progress information should be readily available on their various devices.<sup>15</sup> SCUP is predicting that "analytics for student tracking and success, including what students do on the web, is likely to fall into IT's lap in some form," representing yet another significant challenge.

As the demands of technology increase and become more complex, information technology staff will become even more challenged. Ensuring adequate wi-fi accessibility for the variety of devices being utilized is one such challenge. It is estimated that "85 percent of all broadband service will be mobile, instead of fixed, because there are now more smart phones (472 million) in the U.S. than PCs (353 million)."<sup>16</sup> The transformation to a mobile society also is challenging website developers to maintain compatibility with the rapid proliferation of tablets, laptops, and mobile phones; provide for adequate storage of data that is increasing at an exponential rate; ensure the security of these systems; and facilitate convenient and reliable access to course work, including compliance with web site standards set forth under the Americans with Disabilities Act.<sup>17</sup> Instructional faculty will also be challenged to develop and maintain their competency in incorporating these new technologies in their classrooms and helping their students do the same.

Institutions will need to be deliberate about how they use technology in instruction and in how they help students benefit from it. SCUP has identified the following developments as significant.

<sup>17</sup> Society for College and University Planning, *Planning Journal*, Accessed subscription online, [http://www.scup.org/page/resources/SCUP\\_PHE](http://www.scup.org/page/resources/SCUP_PHE), 2012

- With over half of high school students having access to a smart phone, student wants include the ability to personalize their learning and to use social media for collaboration.
- A review of 40 years of research on the effects of technology on learning indicates that when technology supports instruction, rather than being the sole means of delivering content, it has a moderate and consistently positive impact on learning.
- A study in a history class (262 students) on the use of 10-minute podcasts with graphics and audio versus just the transcript of the podcast found no substantial difference in class performance. However, when gender was considered, male students who listened to the podcasts improved their pre-test results on the post-test, while female students showed no difference.
- Students who delayed at least five minutes before answering texted questions sent by the researchers during a video lecture scored 85 percent or more; those who answered quickly, scored 75 percent or less.
- Students who were permitted to use instant messaging (IM) while reading a passage in a psychology course took 22 to 59 percent longer to complete the reading than groups that only used IM before or after reading. That result came even after the researchers subtracted the time students spent on IM while doing the reading.

Of the many technology challenges described above, data security is foremost. In a SCUP survey of public IT executives, reported incidents of security breaches have increased by 659% from 2006 to 2010. The activities of “hacktivists”, whose sole purpose is to hack into servers to see what information can be collected and leak the results publicly to advance their agendas, are on the rise and postsecondary education is not immune.<sup>18</sup> Resources will be needed to providing the necessary data security and providing the hardware needed to maintain digital classrooms, placing additional demands for scarce resources on institutions of higher education.

Other technology trends identified by SCUP include the following:

- Students are “bringing it with them,” mobile technologies are the future landscape for learning; and they’ll include gesture, search, voice, and video capacities.
- K-12 students perceive mobile devices as presenting significantly greater opportunities for learning in their classrooms than do either their teachers or IT administrators.
- There is likely to be an under supply of IT professionals, let alone librarians, to manage and curate all that data.
- How will faculty members help students effectively use this vast amount of data? Curation is becoming an issue for everyone, not just archivists.
- When children under 12 were asked to predict the future of technology, their answers reflected trends that are already emerging—the use of embedded sensors, image and the Internet of Things (IoT).
- Student respondents to a recent survey by CourseSmart™ indicated that they used an average of three different digital devices on a daily basis, with 98% indicating that they own a digital device.

---

<sup>18</sup> Woodhouse, Kellie. *University of Michigan servers hacked as part of political statement on higher education*. The Ann Arbor News. October 3, 2012. Accessed online: <http://www.annarbor.com/news/university-of-michigan-servers-hacked-as-part-of-political-statement-on-higher-education/#.UG2N1pjAefk>.

- Higher education is using social media, but mostly for admissions' purposes.
- A Pew Research Center report from August indicated that 57% of recent college graduates reported using a laptop, smartphone, or tablet device in class at least sometime.
- The merging of mobile devices and learning in traditional institutions has yet to be realized. Some educators have been effective, but the vast majority are not even thinking about it.
- The amount of time people spend reading online is nearly equal to the amount of time they spend reading print.
- By 2015, more people in the US will access online content through mobile devices than through wired Internet connections.
- The digital divide will remain. Among lower-income children, 27% have a parent with a smart phone; among upper-income children it's 57%. In fact, 38% of lower-income parents report they don't know what an 'app' is compared with just 3% of upper-income parents.
- Increasingly, institutions need to consider how to handle the intellectual property rights of students. Undergraduate research, an emphasis on entrepreneurship, and the digital revolution have now made such policies mandatory.
- The push to create a uniform data sharing system for K-20 education has meant that the Family Educational Rights and Privacy Act (FERPA) rules have been rewritten and require that everyone who has access to student data be held to the same privacy and security requirements.
- As institutions move some services to outside providers and the cloud, their ability to directly monitor or enforce compliance with privacy policies is compromised. When tablet devices are taken into account, campus IT has an even bigger problem with securing data and privacy.

### Technology Trends Conclusion

Higher education is exploring the boundaries of existing technology as new devices, applications, and teaching strategies undergo exponential growth. To remain competitive in a dense educational landscape, Harper will need to stay on the cutting edge of this technology and knowledgeable about how these tools can support learning. MOOCs are finding their place in the toolkit of technology-enabled teaching and learning as the value of hybrid learning and face-to-face interaction continues to be validated. Data security will become increasingly critical as Harper students move even more of their learning online. Community college IT departments will be challenged to provide needed technical support for rapidly increasing numbers and types of mobile devices, while continuing to address the learning technology needs of less resourced students.

---

## Political Trends

---

### Environmental Changes

Rapid population growth in developing countries around the world will increase demand for both natural resources and manmade goods. China and India, the world's two most populous countries, are fast-forwarding through an industrial revolution and creating a robust middle-class society. The demand for better working conditions and higher wages have led to the demand for improved housing, cars, and a general increase in the quality of life. However, with those improvements there is a cost. SCUP reports predictions that China could run out of drinkable water by 2030 and the increased demand for products and service will further strain available resources. Global shifts in resource consumption will play out in different ways, but the impacts on energy production and processes will be felt everywhere.

The American public is no longer as green: only 4% of consumers actually purchase green products when 40% claim that they will<sup>19</sup>. The sacrifices necessary to achieve a sustainable lifestyle are not being made. Expansion of technology will increase the need for energy to keep it running. It is hoped that wind power will be a lower cost alternative to meet energy demand, but it is not ready for large scale deployment.<sup>20</sup>

### Regulatory Trends

There will be increasing standardization and regulation at the local, state and federal levels. Increasing accountability will come with decreasing funds, requiring creative solutions to compliance. Some states are basing their higher education funding allocations on outcome-based metrics such as credit hours, completions, and gainful employment. Primary and secondary education are experiencing new mandates in attempts to find improved educational outcomes. The Common Core State Standards have been implemented and will now be included in the SAT exam. Proponents assert that standardized performance expectations will help level the playing field, identify effective educational practices, and help ensure that all students are prepared for college and the workforce. Detractors question the effectiveness of the standards and whether the opportunity costs associated with the implementation of the Common Core warrant the investment.

According to SCUP, research has been conducted to determine the effectiveness of state teacher licensure tests and the results have not correlated licensure with student success in the classroom. New research may be needed to determine the best combination of academic performance standards and teacher preparation.<sup>21</sup>

<sup>20</sup> Society for College and University Planning, Planning Journal, Accessed online: Subscription Based, [http://www.scup.org/page/resources/SCUP\\_PHE](http://www.scup.org/page/resources/SCUP_PHE), 2013

<sup>21</sup> Society for College and University Planning, Planning Journal, Accessed online: Subscription Based, [http://www.scup.org/page/resources/SCUP\\_PHE](http://www.scup.org/page/resources/SCUP_PHE), 2013

### Political Trends Conclusion

Distant global changes, most notably in China and India, are impacting the Harper district locally. As these countries continue to industrialize and create a robust middle class with their attendant demands for products, the environment will be increasingly stressed and natural resources threatened. These pressures will be felt throughout the U.S. as America's commitment to sustainability, alternative energy, and environmental protection is challenged.

Accountability in higher education remains a focus as outcome-based metrics are increasingly being used to determine funding. A national trend toward a rigorous core K-12 curriculum is reflected in Illinois in the adoption of the Common Core State Standards. As these standards are translated into primary and secondary schools in the Harper district, it is expected that more students will be ready for college-level learning.

---

## *Postsecondary Educational Trends*

---

### Credentialing and Documentation of Competency

The question of what students learn in college, not just whether they graduate, will likely further stimulate discussion and debate. For-profit businesses will continue to find ways to help people document their skills in ways accepted by employers. SCUP has identified recent developments in the past three years that presage future trends:

- The Lumina Foundation released a draft of a degree qualifications profile in 2011 in an effort to spark discussions on what a college graduate should know and be able to do.
- ACT continues to promote options for people to document workforce skills so they can stack credentials that are transferable. This will go a long way to transforming the role of higher education beyond certification.
- The MacArthur Foundation and Mozilla have partnered to create a digital badge system that would help holders identify the competencies gained via informal learning.
- Online learning portals that allow students to have their skills assessed by college professors for credit through providers like Learning Counts and Knext will likely become increasingly acceptable to employers as proof of competency.
- Open courseware is likely to be accepted and available on every campus as a support to traditional learning and, increasingly, as a substitute for sitting in a classroom.

### Global Education

If they are increasing college graduates then by definition they are retaining them. Maybe: Nearly every nation in the world is aware that they must increase their numbers of college graduates, which requires effective strategies for recruitment, enrollment, and retention to completion. SCUP has identified strategies being adopted by other countries to better compete in the global education marketplace.

- Australia has relaxed its visa requirements seeking to revitalize its once thriving international student population.
- India and China now treat each other's degrees as equivalent, except in medicine and pharmacy.
- The U.S., Europe, and China each contribute 20% of the world's researchers, but the economic crisis has caused a decrease in R&D in developed nations, so research is expected to continue to increase in China, India, and Brazil.
- Student, faculty, and researcher mobility will continue to reduce the hold that English-speaking nations have had on attracting international talent.
- China announced plans to increase from its present 8 million higher education students to 200 million by 2020 and students will be judged more on merit and skills than affiliation with the Communist Party.
- Bilateral trade has been found to be a significant predictor of overseas student flows, which could spell trouble for the U.S. if trade relations with China don't improve soon.
- In the fall of 2013, Southeast Asian nations began piloting a credit transfer system similar to Erasmus, the European Union's flagship education and training program promoting student mobility throughout Europe.

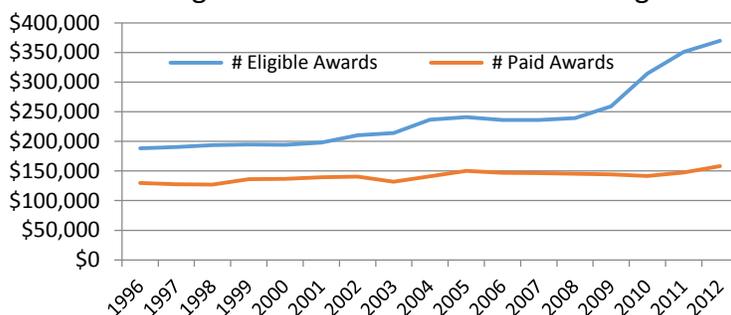

U.S. colleges and universities are diversifying their campus by attracting students from other countries and offering online courses that reach students from around the world. However, the rate of growth in international student enrollment in the U.S. has lagged that of other destination nations such as Australia (125%) and Canada (189%). Immigration policy in the U.S. can help simplify the process for foreign students who wish to remain in the U.S. after graduation to work, many of whom are highly qualified doctoral and master’s students who would like to stay.

The upshot is that schools in the U.S. are not faring well globally. According to the Program for International Student Assessment (PISA) which measures student proficiency in core academic subjects, the U.S. ranks 36<sup>th</sup> in math, 28<sup>th</sup> in science, and 24<sup>th</sup> in reading. There were 18 education systems that scored higher than the U.S. in all three subjects: Australia, Canada, Chinese Taipei, Estonia, Finland, Germany, Hong Kong-China, Ireland, Japan, Liechtenstein, Macao-China, Netherlands, New Zealand, Poland, Republic of Korea, Shanghai-China, Singapore, and Switzerland (Kelly & Xie, 2012).

### Education Finance

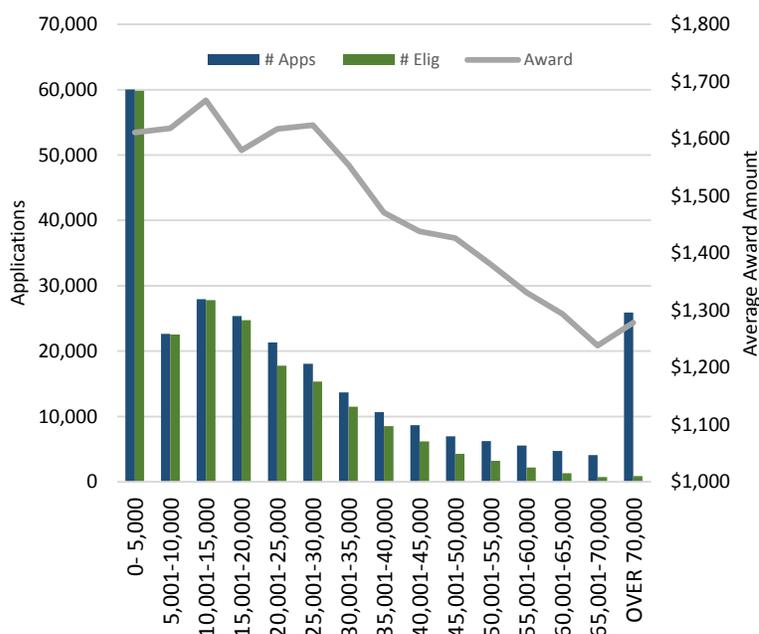

State funding available to help students with the cost of postsecondary education has not kept pace with need. Although there has been a shortfall in meeting students’ financial needs since the inception of the Illinois Monetary Awards Program (MAP) in 1996, the gap has widened dramatically since the recession began in 2008 (Figure 24). A breakdown of MAP awards in 2012 illustrates that the most grants were awarded to students with the lowest incomes. The amount of the awards ranged between \$1,700 and \$1,250 (Figure 25).

Figure 24: Illinois MAP Grant Funding

Source: ISAC, MAP Historical Awards and Payout Summary, Data Book

Figure 25: Monetary Award Eligibility by Income Level in Public 2 Year Illinois Institutions - 2012

Source: Illinois Student Assistance Commission, Table 2.4c of the 2012 ISAC Data Book for Public 2-Year Institutions

The cost of attending college continues to be the subject of considerable discussion in the U.S. and around the world as the model of public funding has rapidly shifted to individual payers. SCUP reports that:

- Among the wealthiest families in the US, 19% don't believe college is worth the investment.
- The latest figures from the UK show a drop of 5.6% in applications from 2011, when they first declined as a result of the introduction of fees of up to £9,000 (approximately US \$14,800) a year.
- The share of first-time, full-time students receiving aid at four-year colleges was 85% for the 2009–2010 academic year.

Student loan debt and need are colliding. A majority of student loan borrowers, 53%, do not believe they will be able to repay their student loan debt which is \$25,000 on average, an increase of 25% over the last decade. Excessive student debt was found to interfere with academic performance for 32% of first-year students and 36% of seniors participating in the National Survey of Student Engagement. Concerns about cost also influenced the decision by 27% of freshmen and 34% of seniors to not purchase required academic material. Other effects, such as excessive student debt, were reported by SCUP include delayed marriage and lower birth rates.

Support of institutional missions has become increasingly difficult due to precarious finances. Consider these SCUP trends:

- Moody's Investors Service's tuition survey found that one-third of US colleges and universities expect net tuition revenue to either decline or grow at a rate below inflation.
- State support for U.S. colleges fell 7.6% in the 2012 fiscal year.
- The disinvestment trend is even targeting the 'sacred cow' of STEM support. A National Science Foundation review found that total state support for public research universities dropped 10% from 2002 to 2010, with 75% of those universities receiving cuts.
- Tuition discounting—the factor that determines the rate that a new, first-year student actually pays—has continued to rise, cutting dangerously into net tuition revenue. The average rate rose to 36.4% in 2012 and was expected to reach 37.2% in 2013.
- Two-thirds of chief financial and business officers reported that their institutions were in “good” or “excellent” financial health, but 70% said that increasing net tuition revenue was a key strategy for raising revenue in the near term.
- State and local revenues have finally climbed or stabilized, but those government entities are investing in hiring their own employees, not in funding higher education.

### Postsecondary Education Conclusion

This is a challenging time for higher education. Never has postsecondary education been more important to the health and competitiveness of our economy and individual workers, yet current and prospective students are finding college prohibitively expensive. Excessive student loan debt not only is saddling learners with obligations that will take years and even decades to repay, but is interfering with academic performance, further widening the achievement gap for low income students, and forcing families to decide which basic needs can be addressed. An uncertain financial future for educational funding at the state and federal levels only exacerbates this situation.

On the pedagogical side, the situation is brighter. Technology has expanded access to information and quality instructional material, and institutions are rapidly learning to balance consumer demand with proven teaching strategies. Illinois' Common Core Standards are anticipated to help ensure that high school graduates are ready to learn at the college level, reducing the need for remediation and enhancing the likelihood of on-time completion. Community colleges again stand to benefit from the ever-growing demand for certificates, which offer the dual benefits of increasing graduation rates and serving as a stepping stone to a college degree. Finally, a history of transparency and accountability with respect to student outcomes provides community colleges with a competitive advantage over many for-profit institutions.

Harper College's challenge is shared by every other higher education institution in the U.S.: continue to offer the best education and workforce preparation value in its market for a diverse array of aspiring students.

## Meeting the Needs of Business and Industry

Determining what types of skills are needed by local employers and offering curriculum, credentials, and work experience to fill those needs is a continuous challenge for community colleges. This section presents current and projected workforce demand of employers and industries and the supply of education and training programs in the region.

### Current Workforce

Employment opportunities for workers have been increasing throughout the Chicago Metropolitan Area but at a very slow pace. Manufacturing remains an industry sector of great strategic importance to the state and the region, but tops the list of biggest job losses (Table 9). Between 2007 and 2012, manufacturing lost 16% of its employment base or 69,446 jobs in the Chicago Metropolitan Area (Illinois

Table 9: Industry Employment and Specialization (2007-2012)	2007 Chicago Metro Employment	2012 Chicago Metro Employment	Chicago Metro Percent Change 2007-2012	State Percent Change 2007-2012	Chicago Metro 2007 LQ	Chicago Metro 2012 LQ

<b>TOTAL</b>	<b>4,011,914</b>	<b>3,838,991</b>	<b>-4.0%</b>	<b>-4.3%</b>		

Source: Illinois Department of Employment Security, Local Employment Dynamics, 2007 & 2012

only). Conversely, health care and social assistance experienced the largest net gain in jobs at 43,799, or an average of 8,760 jobs per year. Educational services, management of companies and enterprises, and accommodation and food services have also added significant numbers of jobs. However, the net employment change over the five-year period for all industry sectors was an annual loss of 34,585 jobs or 4%, slightly better than the comparable state rate of -4.3%.

### Location Quotients

Regions tend to specialize in certain industry sectors. A location quotient compares an industry's share of regional employment with its share of national employment and can reveal what makes a region's industry profile unique. If a location quotient is 1.0, then the employment is the same proportion as it is across the nation. An LQ less than 1.0 has less employment than would be expected, and greater than 1.0 has more employment, indicating some level of specialization and export orientation of that industry.

In the Harper region, see Table 10, the management of companies and enterprises has the highest LQ of all industries, and employment has increased by 1.5%, or an additional 1,396 jobs. Educational services is also promising with an LQ of 1.35 in 2011 and an increase of 11,773 jobs, or 4.8%. Health care and social assistance grew the most in employment, adding another 30,392 jobs, but has an LQ of .95. If it continues to grow, this sector could emerge as an export industry and be positioned to bring money into the region. Nationally, the health care and social assistance industry is projected to grow by 5.0 million becoming the largest industry by 2022<sup>22</sup>. The Harper region seems to be following suit as it already is the largest industry when combining Cook, Lake and McHenry Counties. However, due to the LQ being lower than 1.0 it can be assumed that a portion of those jobs that could be filled internally do not exist. The level of employment in that industry necessary to supply the services in demand is low, so there is room to grow.

	2006	2011	2011 Employment	Percent Change
Management of companies and enterprises	1.41	1.45	2,921,669	1.5%
Educational services	1.34	1.35	3,386,047	4.8%
Professional, scientific, and technical services	1.32	1.25	7,929,910	-8.2%
Finance and insurance	1.35	1.25	5,886,602	-19.7%
Transportation and warehousing	1.21	1.18	4,106,359	-8.8%
Wholesale trade	1.20	1.17	5,626,328	-10.2%
Administrative and support and waste management and remediation services	0.95	1.06	9,389,950	3.2%
Other services (except public administration)	1.05	1.01	5,181,801	-10.2%
Information	0.96	0.99	3,121,317	-6.1%
Health care and social assistance	0.95	0.95	18,059,112	8.4%

Agriculture, forestry, fishing and hunting	0.06	0.06	156,520	-10.3%

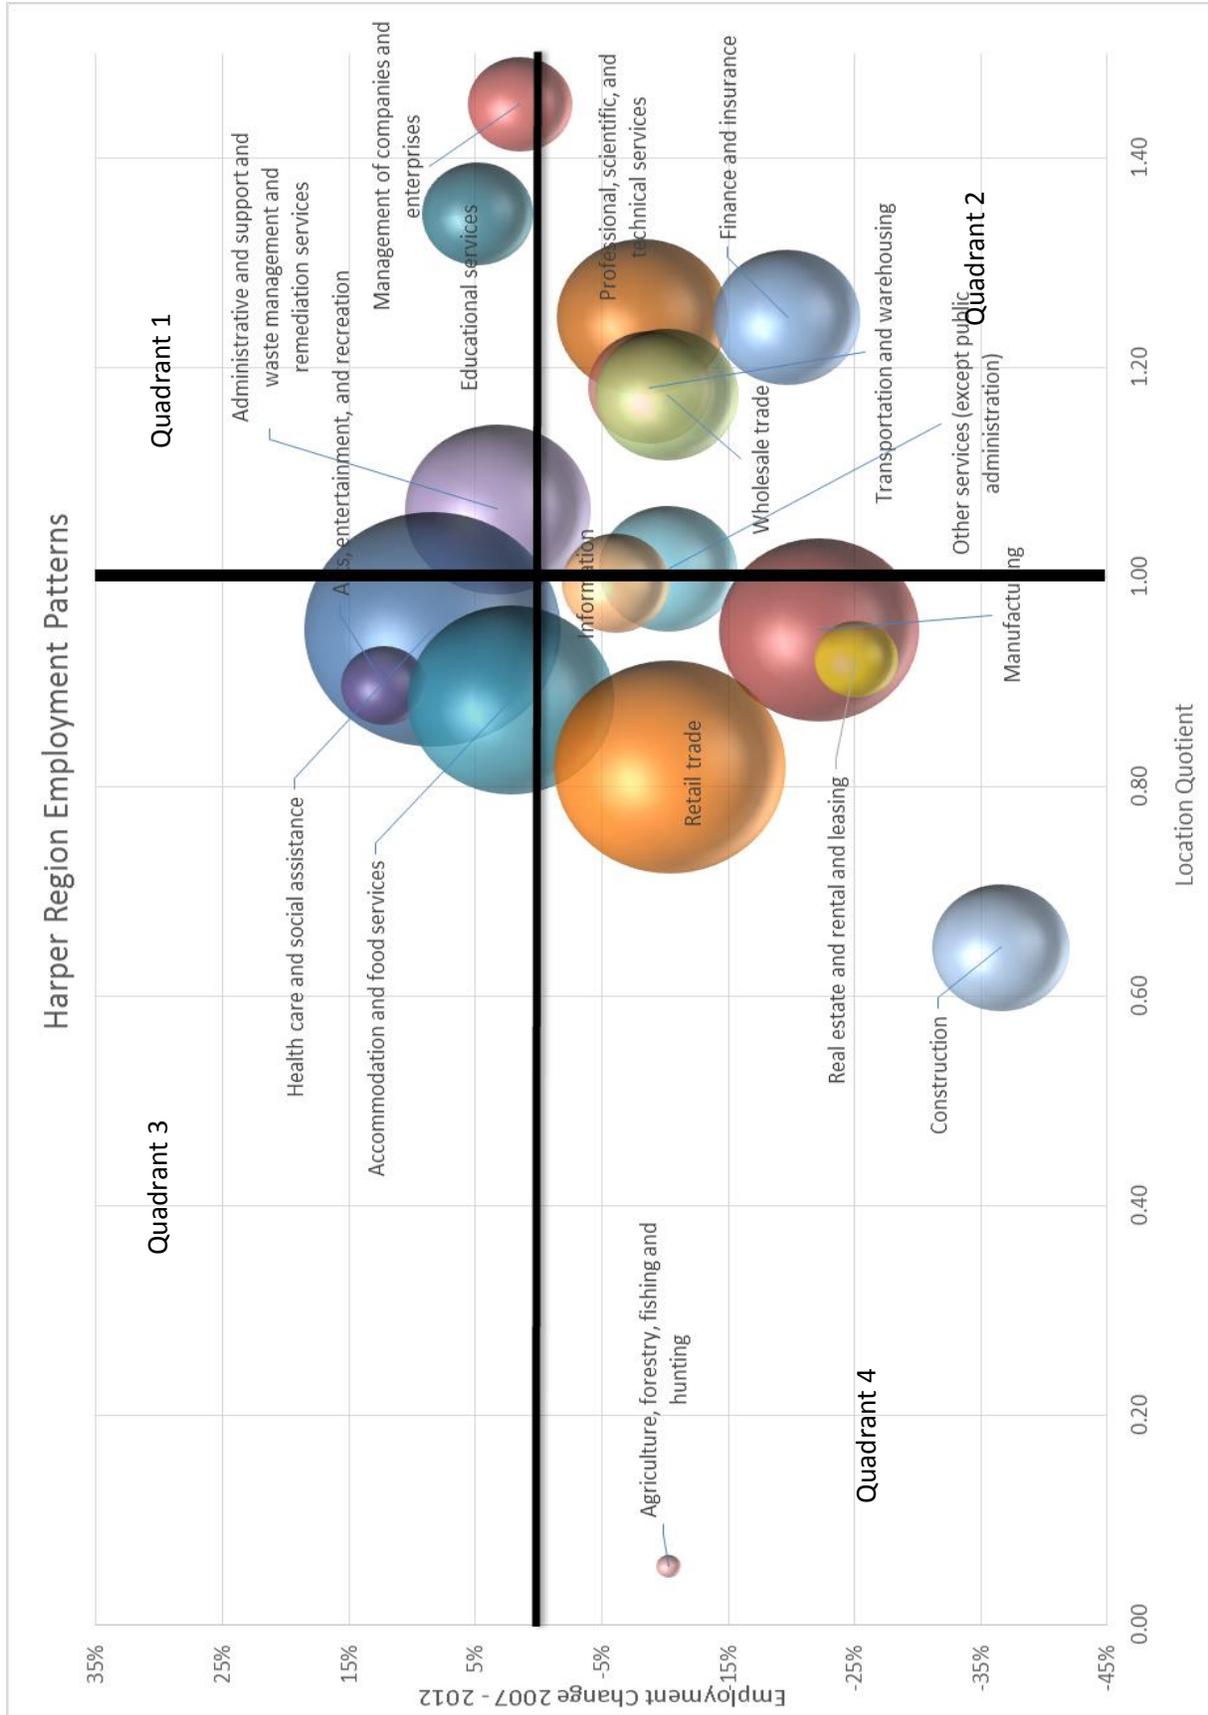

Source: US Census Bureau, County Business Patterns, 2006 & 2011. LQ Calculated against National figures.

<sup>22</sup> Bureau of Labor Statistics, Publication. January 2014. Accessed online 02-01-2014 at [http://www.bls.gov/opub/ted/2014/ted\\_20140110.htm](http://www.bls.gov/opub/ted/2014/ted_20140110.htm).

The graphic on the next page, Figure 26, is a visualization of this information. The size of the bubble is proportionate to employment in 2011. The location quotient is located on the X axis, while the percent change in employment from 2006 to 2011 is on the Y axis. The graphic is divided into four quadrants. Those within the upper right quadrant are those industries with specialization along with an expanding workforce. Specialization is determined by the LQ, as the proportion of those employed within those industries is greater than would be found nationally. Therefore, those industries are meeting the demand in the Harper region and are exporting to areas outside the Harper region, bringing more economic advantage to the three counties. Industries in the lower right, or quadrant 2, have more specialization than would be expected, but have a contracting workforce, such as the Finance and insurance industry. The employment proportion is still greater than what is seen across the country, so some of their services are still being exported, but the employment level is on the decline. The upper left, quadrant 3, has an expanding workforce, but less employment than would be expected in the area, so those industries have promise for growth to meet the demand, such as Health care and social assistance. As previously discussed, it is anticipated this industry in particular will eventually become the largest industry as the Baby Boomers require more services. Those industries falling in to the lower left, quadrant 4, are contracting in the workforce as well as having less than expected employment, such as Construction, which is still struggling to return to pre-2008 levels of employment due to the housing crisis wiping out a large proportion of those jobs. These industries have opportunity for growth to meet demand as some of their services must be imported from outside the three counties.

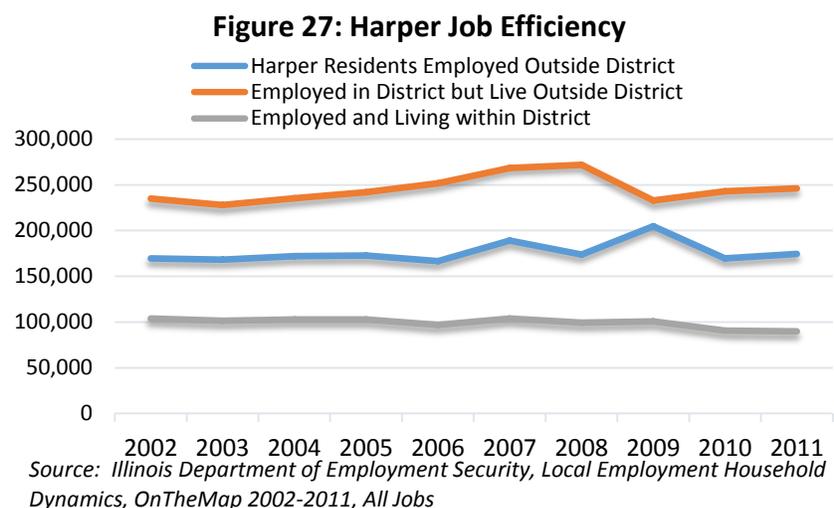

The Manufacturing industry also falls into the fourth quadrant and while the workforce is contracting and has been for many years, there are many replacements needed to fill retirements and other workers who leave the industry. The LQs are only to help determine how the proportions of the local industries compare to the proportion of the country. They are not intended to be an indicator of industries not worthy of attention by higher education institutions. The LQ is a way of determining how concentrated, or clustered, a particular industry is in the region and what makes it unique.

Figure 26: Location Quotients by Industry Employment

## Commuter Patterns

The Harper district has a defined boundary. However, because in-district tuition is provided to those who also work within the district the actual “labor shed” of the district extends beyond the established boundary. There are three groups of workers to consider: those who live in the district but commute outside the district to work, people who live outside the Harper district but work within the district, and those who live and work within the Harper district (Figure 27).

In 2011, there were 174,546 residents who worked outside the district, 245,961 jobs filled by those living outside the district, and a total of 89,764 jobs in the Harper district filled by those who also lived within the district in 2011. These numbers fluctuate over time but in the last decade there have always been more jobs in the district than residents available to fill them. In 2009 as the number of jobs declined

in the Harper district, many residents were forced to seek jobs outside of the district causing an uptick for those commuting workers. Numbers of those who both live and work within the district have also been declining, particularly since 2008.

All three commuter categories experienced net decreases between 2002 and 2012 in the three broad industry groups listed in Table 11, with major exceptions in the “All Other Services” category. The gains in that category for residents commuting outside the district and people residing outside the district and commuting in were 14.1% and 21.0%, respectively. It is noteworthy that 26,451 workers are commuting

	Commuter Origination	Numeric Change	Percent Change
Workers in the "Goods Producing" Industry Class	Residents Commuting Outside the District	-7,055	-23.5%
	Commuters into the District	-15,044	-29.1%
	Residents working within District	-5,047	-30.6%
Workers in the "All Other Services" Industry Class	Residents Commuting Outside the District	13,187	14.1%
	Commuters into the District	26,451	21.0%
	Residents working within District	-6,016	-8.7%
Workers in the "Trade, Transportation, and Utilities" Industry Class	Residents Commuting Outside the District	-1,270	-2.8%
	Commuters into the District	-398	-0.7%
	Residents working within District	-3,093	-16.7%

Source: US Census Bureau, Local Origination Destination Employment Data, 2002-2012, All Jobs

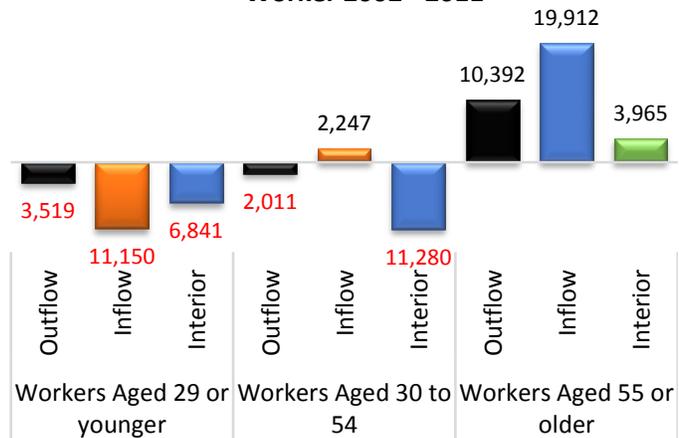

to jobs in the Harper region from outside, jobs that potentially could be filled by qualified workers within the region. Decreases in the “Goods Producing” industries reflect the loss of manufacturing jobs throughout the region.

Because older workers are remaining in the workforce longer and since there are more of them due to the Baby Boomer generation, age factors into the commuter profile. Figure 28 shows commuter origination data by age and all have declined with the exception of those 55 or older and a small number of middle aged workers who are commuting into the district. These numbers reflect changes between 2002 and 2011, so there is an additional 34,269 workers over the age of 55 in the Harper district. The net loss of workers under age 55 represents 32,554 jobs, the majority of which are workers under the age of 29.

However, what about the proportion of those aged 55 or older compared to the remaining Harper market? In 2002 the proportion of jobs held by those aged 55 or older was 14.3% or 72,768 jobs. Workers aged 29 or younger were at 25.9%, or 131,725 jobs, and those middle-aged held the remaining 59.8%, or 304,063. In 2011 the middle aged group remained fairly steady at 57.4%, or 293,019 jobs. Young workers fell to 21.6%, or 110,215 jobs. Those aged 55 or older increased to 21.0% of the workforce, or 107,037 jobs.

The same trend can be seen when looking at second jobs. Due to the decline in the economy, workers are picking up second jobs to fill the gap between paychecks. Those aged 55 or older have almost doubled in numbers since 2002, from 4,294 to 7,749 additional jobs. The secondary jobs are overwhelmingly in the “All Other Services” sector.

**Figure 28: Commuting Pattern by Age of Worker 2002 - 2011**

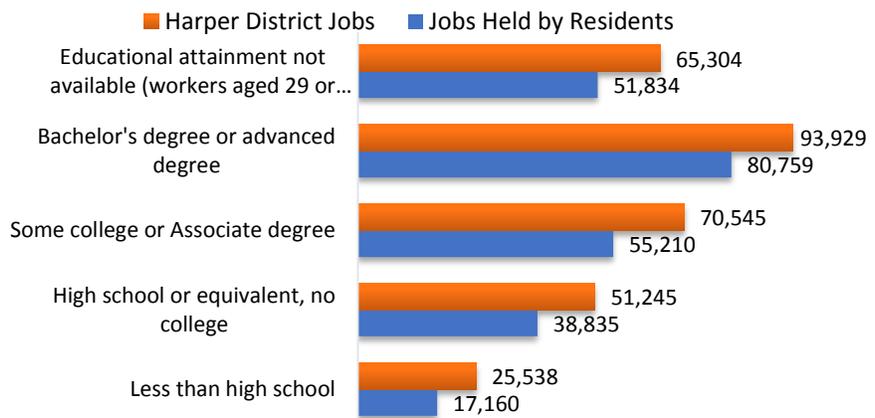

Source: US Census Bureau, Local Household Employment Dynamics, 2013, All Jobs

### Worker Education Attainment

Educational attainment of workers in 2011 reveals that the majority of jobs are held by those with a postsecondary credential (Figure 29). There are 306,561 jobs within the Harper district and 53.7% of them, or 164,474 jobs, are held by those with at least some college experience. Of the jobs occupied by workers who live within the Harper district, 55.8% are held by persons with at least some college experience. In comparison, statewide the percentages are 49.2% and 49.0% respectively.

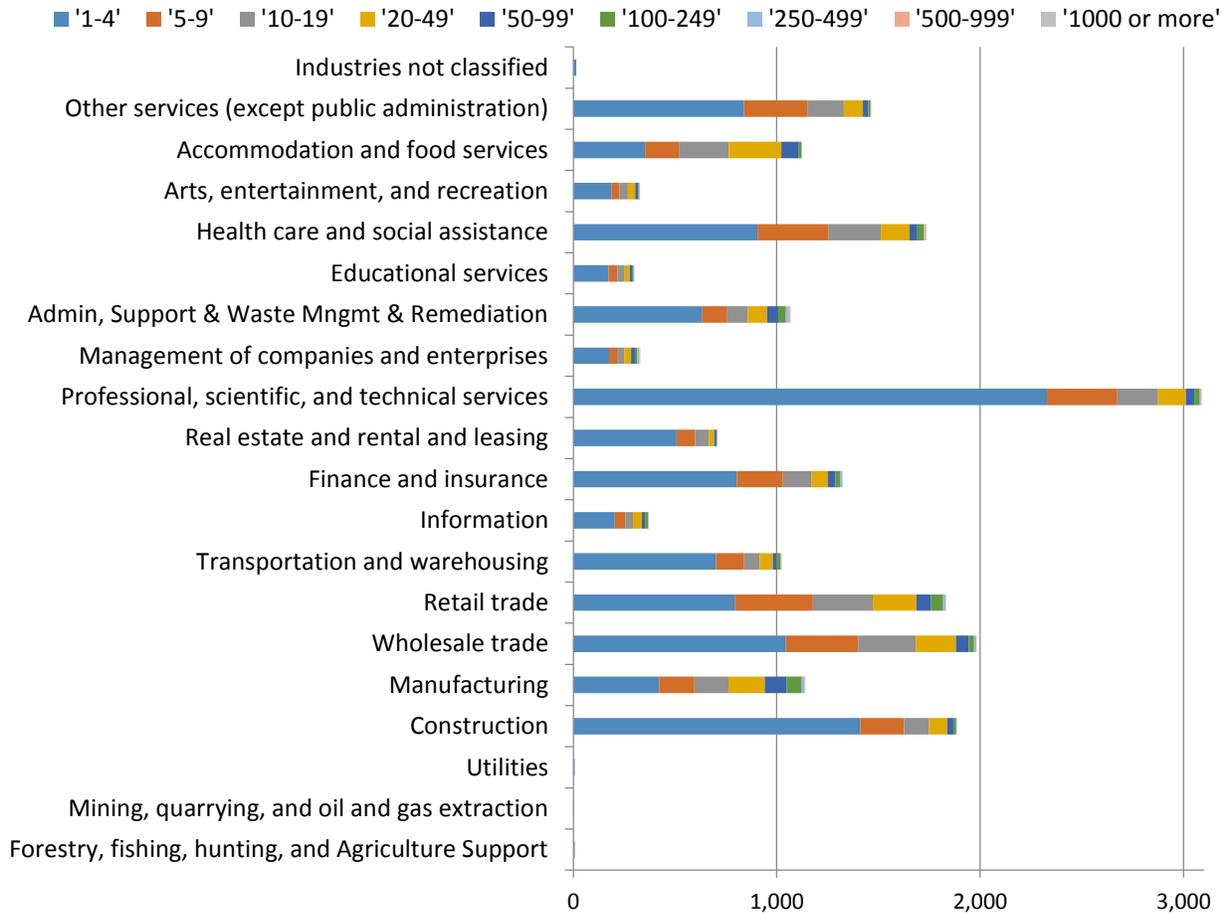

**Figure 29: Workforce Education Attainment - 2011**

Source: US Census Bureau, Local Household Employment Dynamics, 2011, All Primary

The overwhelming establishment size is small, five to nine employees overall, 58% of all establishments fall into the smallest category (Figure 28). According to the Census Bureau, from 2010 to 2011, there also was an increase in small companies in the Chicago Metropolitan area that have only one to four paid employees, data which are not collected by the Illinois Department of Employment Security. The estimate has been rising as a proportion of all establishments from a low of 54.8% in 2004 to 57.3% in 2010. Entrepreneurialism of small companies is growing in the Harper region.

## Currently Available Jobs

The Illinois Department of Employment Security subscribes to a service that uses web spider crawling technology to scrape job posting data from online job boards, newspapers, and other sites to get an idea of which occupations are most in demand. The top advertised occupations in the Chicago Metropolitan Area have consistently been in the computer and mathematical fields since IDES began subscribing to these data (Table 12). Management and sales occupation have also been in high demand. This job posting data can be useful in identifying immediate workforce needs of local employers. However, it is to be noted that some industries tend to advertise online more often than others who rely on word-of-mouth, professional associations, or other outlets to market openings.

**Table 12: Help Wanted Online Ads - Chicago Metropolitan Area**

	December-13
Computer and Mathematical Occupations	22,027
Management Occupations	21,200
Sales and Related Occupations	19,206

## Future Workforce

Manufacturing may be losing the most jobs, but it is still the largest industry sector in the Harper district. Large employers continually need to replace workers who leave due to retirement or for other reasons. An industry could be contracting in size but require a significant number of replacements. The top ten occupations, including replacements and anticipated new jobs, are listed below in Table 13. The majority of those occupations with high replacement rates are those requiring little to no education or training. For example, cashier jobs are not expected to grow but almost half are expected to turn over with 30,380 replacements. Elementary school teachers are among the occupations requiring at least some college that have the greatest demand. The projected replacement is 8,230 jobs by 2020 and, combined with another 5,844 new jobs, will total 14,074 jobs projected to become available between 2010 and 2020 (the full list of occupations are presented in Appendix D).

**Table 13: Top 10 Occupation Projections 2010-2020 (Cook, Lake and McHenry Counties)**

	Education	Weighted Median Wage	2010 Employment	Replacements	Growth	Total Job Potential
Cashiers	Less than high school	\$19,463	66,951	30,380	163	30,543
Combined food preparation and serving workers, including fast food	Less than high school	\$18,862	57,160	15,950	12,911	28,861
Retail salespersons	Less than high school	\$20,467	84,739	24,890	2,684	27,574
Waiters and waitresses	Less than high school	\$18,902	38,705	19,320	6,325	25,645
Laborers and freight, stock and material movers, hand	Less than high school	\$23,156	57,301	18,320	2,558	20,878
Customer service representatives	High school diploma or equivalent	\$35,318	54,448	15,470	2,971	18,441
Office clerks, general	High school diploma or equivalent	\$29,986	68,975	12,210	4,826	17,036
Janitors and cleaners & except maids and housekeeping cleaners	Less than high school	\$24,368	54,737	10,320	4,980	15,300
Elementary school teachers, except special education	Bachelor's degree	\$60,750	37,455	8,230	5,844	14,074
Business operations specialists	High school diploma or equivalent	\$59,688	47,225	9,050	3,383	12,433

Source: Illinois Department of Employment Security, Employment Projections, Occupations – Long Term, 2010-2020

The 10 years from 2010 to 2020 are projected to add a total of 197,316 jobs to Cook, Lake, and McHenry counties in 974 occupations (Table 14). Another 663,780 jobs will need to be filled as a result of replacements. The total job potential is 861,096 over 10 years, or approximately 86,000 per year. An astounding two-thirds or 67.9% of these jobs are in occupations requiring a high school degree or less. With the exception of 0.5% of jobs for which the required level of education is unknown, the remaining 276,111 jobs to be filled will require at least some college credit.

**Table 14: 2010 to 2020 Occupation Projections by Education Required (Cook, Lake and McHenry Counties)**

	2010 Employment	Replacements	Growth	Total Job Potential	Occupation Count
Less than high school	754,676	218,740	69,376	288,116	98
High school diploma or equivalent	1,167,137	256,250	40,619	296,869	358
Some college, no degree	22,225	5,050	2,022	7,072	5

Source: Illinois Department of Employment Security, Employment Projections, Occupations – Long Term, 2010-2020

In comparison, the state is projected to experience a much higher turnover in those occupations requiring a high school diploma or less (Table 15). A more equal distribution of occupations among all education attainment categories exists in the Harper district, although the highest turnover is projected in those occupations with less than high school education required.

### Meeting the Needs of Business and Industry Conclusion

Harper College serves a diverse industry and employer base representing a wealth of career opportunities for its students. Manufacturing remains an industry sector of great strategic importance despite its loss of jobs over the last five years. Health care and social assistance,

educational services, management of companies and enterprises, and accommodation and food services also offer significant employment opportunities. As Harper continues to partner with area employers and offer quality education and training programs for its students, a major challenge will be to help connect students with local employers and actual job opportunities. Further, with two-thirds of projected jobs requiring only a high school degree or less, Harper can play a role in helping students

**Table 15: Turnover in Occupations by Education Required Statewide and in Cook, Lake and McHenry Counties 2010 to 2020**

	Statewide	Harper Region
Less than high school	51.4%	29.0%
High school diploma or equivalent	58.8%	22.0%
Some college, no degree	1.2%	22.7%
Postsecondary non-degree award	6.3%	20.9%
Associate's degree	2.1%	20.2%
Bachelor's degree	25.2%	22.2%
Master's degree	2.2%	23.2%
Doctoral or professional degree	3.5%	19.3%
Unknown	0.7%	26.3%
<b>Summary total</b>	<b>15.8%</b>	<b>23.8%</b>

Source: Illinois Department of Employment Security, Employment Projections, 2010-2020

plan careers that begin with an entry-level job but grow into careers with expanded earnings potential. Harper can also play a role in strengthening the connections between local employers and Harper graduates. Commuter data show that almost 175,000 Harper district residents commute to jobs outside the district, while another 246,000 jobs within the district are held by people who live outside the district. By preparing students for jobs within its district, Harper provides employers with quality workers and its graduates with employment that is closer to home.

## Appendix E: Programs within 25 Mile Radius of Harper Main Campus

<b>CIP</b>	<b>School</b>	<b>City</b>	<b>Program</b>
10504	Academy Of Dog Grooming Arts Ltd	Arlington Heights	Professional Pet Grooming Day Program
10504	Academy Of Dog Grooming Arts Ltd	Arlington Heights	Professional Pet Grooming Night Program
10504	Doggone Rite Dog Grooming Academy	Chicago	Professional Groomer Course
10504	Doggone Rite Dog Grooming Academy	Chicago	Groomer's Assistant
10605	COLLEGE OF LAKE COUNTY	Grayslake	Landscape Maintenance 21HH
10605	COLLEGE OF LAKE COUNTY	Grayslake	Horticulture (A.A.S.) - Landscape Design Option
10605	Triton College	River Grove	C401A Landscape Design Certificate
10606	College Of DuPage	Glen Ellyn	Nursery And Garden Center Management Certificate
10607	COLLEGE OF LAKE COUNTY	Grayslake	Hort (A.A.S.) - Landscape Construction and Maintenance
10608	Arturo Velasquez Institute	Chicago	Sustainable Urban Horticulture
10608	Richard J Daley College	Chicago	Sustainable Urban Horticulture
10699	Oakton Community College	Skokie	Horticulture Therapy Certificate
30201	COLLEGE OF LAKE COUNTY	Grayslake	Horticulture (A.A.S.) - Natural Areas Management Option
30506	Northern Illinois University	Hoffman Estates	Geographical Information Systems (GIS) Certification
40901	Oakton Community College	Skokie	Architectural Technology Certificate Program
90101	Aurora University	Aurora	Major in Communication (BA)
90199	Roosevelt University	Schaumburg	Communications: Bachelor of Liberal Studies
90199	Roosevelt University	Chicago	Communications: Bachelor of Liberal Studies
90402	Illinois Center for Broadcasting	Lombard	Radio and Television Broadcasting
90701	College Of DuPage	Glen Ellyn	Television Production Degree
90702	COLLEGE OF LAKE COUNTY	Grayslake	Digital Media and Design - AAS
90702	Oakton Community College	Skokie	Animation and Multimedia Certificate (0371)
90999	DePaul University	Chicago	Integrated Marketing Communications Certificate
100201	College Of DuPage	Glen Ellyn	Film/Video Production Degree
100201	ICV Audiovisual Solutions	Chicago	ICV Technical Audiovisual/Multimedia Training Program
100201	ICV Technical Learning Center	Chicago	ICV Technical Audiovisual/Multimedia Training Program
100303	College Of DuPage	Glen Ellyn	Print Production Degree

<b>100303</b>	Triton College	River Grove	Visual Comm. - Graphic Des. & Graphic Arts Cert. C348C
<b>100303</b>	Triton College	River Grove	C348W Layout and Design Certificate
<b>100304</b>	Waubensee Community College	Aurora	Animation Certificate
<b>110101</b>	Illinois Institute of Technology	Wheaton	Building and Leading Effective Teams
<b>110101</b>	Illinois Institute of Technology	Wheaton	A+/Network+/System and Network Security
<b>110101</b>	Illinois Institute of Technology	Wheaton	Proj Mgt for IT/ DB Concepts with Oracle/Internet Technology
<b>110101</b>	Illinois Institute of Technology	Chicago	Building and Leading Effective Teams
<b>110101</b>	Illinois Institute of Technology	Chicago	A+/Network+/System and Network Security
<b>110101</b>	Illinois Institute of Technology	Chicago	Proj Mgt for IT/ DB Concepts with Oracle/Internet Technology
<b>110101</b>	Illinois Institute of Technology Main Campus	Chicago	Building and Leading Effective Teams
<b>110103</b>	ACT-Advanced Computer Training	Glenview	Technology Professional Complete
<b>110103</b>	Illinois Institute of Technology	Wheaton	Proj Mgt for IT/ Data Analytics/Proc Engnrng for IT Mngrs
<b>110103</b>	Illinois Institute of Technology	Chicago	Proj Mgt for IT/ Data Analytics/Proc Engnrng for IT Mngrs
<b>110103</b>	Kennedy-King College	Chicago	Computer Information Systems /A.A.S. Degree #011 (KKC)
<b>110103</b>	MicroTrain Technologies	Deerfield	IT Management 3
<b>110103</b>	MicroTrain Technologies	Lombard	IT Management 3
<b>110103</b>	MicroTrain Technologies	Chicago	IT Management 3
<b>110103</b>	New Horizons Computer Learning Centers of Chicago	Chicago	Office Specialist Program
<b>110103</b>	Oakton Community College	Skokie	Windows Server Administration Certificate
<b>110103</b>	TEC Services - Charles Hayes Center	Chicago	Information Technology Certification Program
<b>110103</b>	Vatterott College	Berkeley	Computer Technology
<b>110201</b>	COLLEGE OF LAKE COUNTY	Grayslake	Computerized Numerical Control (AAS)
<b>110201</b>	DePaul University	Chicago	Java Developer Program
<b>110201</b>	Elgin Comm. College District #509	Elgin	Microcomputer Specialist AAS
<b>110201</b>	Harry S. Truman College	Chicago	Computer Information Systems - Basic Certificate (TRC)
<b>110201</b>	Harry S. Truman College	Chicago	Computer Information Systems - Associate in Applied Science
<b>110201</b>	Harry S. Truman College	Chicago	Computer Information Systems - Advanced Certificate (TRC)
<b>110201</b>	Illinois Institute of Technology	Wheaton	Embedded Systems
<b>110201</b>	Illinois Institute of Technology	Wheaton	Fundamentals of Multimedia
<b>110201</b>	Illinois Institute of Technology	Wheaton	Database Security

110201	Illinois Institute of Technology	Wheaton	Secure Software Programmer Java
110201	Illinois Institute of Technology	Wheaton	Java/XML Technologies & SOA/Data Warehousing
110201	Illinois Institute of Technology	Chicago	Java/XML Technologies & SOA/Data Warehousing
110201	Illinois Institute of Technology	Chicago	Secure Software Programmer Java
110201	Illinois Institute of Technology Main Campus	Chicago	Fundamentals of Multimedia
110201	Illinois Institute of Technology Main Campus	Chicago	Database Security
110201	Illinois Institute of Technology Main Campus	Chicago	Embedded Systems
110201	McHenry County College	Crystal Lake	Computer Programmer Certificate
110201	Robert Morris College	Chicago	Computer Programming
110201	Triton College	River Grove	C515c Windows Programming Advanced Certificate
110201	Vatterott College	Berkeley	Information Systems & Application Development
110202	ACT-Advanced Computer Training	Glenview	ERP and Business Intelligence Basics
110202	College Of DuPage	Westmont	Software Development Degree
110202	College Of DuPage	Glen Ellyn	Software Development Degree
110202	College Of DuPage	Naperville	Software Development Degree
110202	COLLEGE OF LAKE COUNTY	Grayslake	Java Programmer (Associates)
110202	COLLEGE OF LAKE COUNTY	Grayslake	.NET Programming Certificate
110202	COLLEGE OF LAKE COUNTY	Grayslake	C++ Programmer
110202	COLLEGE OF LAKE COUNTY	Grayslake	C++ Programming Certificate
110202	DCG Incorporated	Naperville	.NET Programming Track
110202	DePaul University	Chicago	.NET Developer Program
110202	Goal Training Educational Center	Skokie	SAP Business Intelligence
110202	Goal Training Educational Center	Skokie	SAP Human Capacity Module
110202	Goal Training Educational Center	Skokie	SAP Sales and Distribution
110202	IIT School of Applied Technology	Chicago	Linux+ Certification Training
110202	Illinois Institute of Technology	Wheaton	Java Programming
110202	Illinois Institute of Technology	Wheaton	Java Programming/Intermediate Java Programming
110202	Illinois Institute of Technology	Wheaton	Introduction to Programming with Java
110202	Illinois Institute of Technology	Wheaton	ASP.Net with C#
110202	Illinois Institute of Technology	Wheaton	C++ Programming
110202	Illinois Institute of Technology	Wheaton	Web 2.0: Rich Internet Applications
110202	Illinois Institute of Technology	Wheaton	Network+ / DB Concepts with Oracle / Project Manag for IT
110202	Illinois Institute of Technology	Wheaton	Java/SQL Databases/Database Security
110202	Illinois Institute of Technology	Wheaton	Java/SQL Databases/Data Analytics

110202	Illinois Institute of Technology	Wheaton	Java/Data Analytics/Database Security
110202	Illinois Institute of Technology	Wheaton	Linux+ Certification Training
110202	Illinois Institute of Technology	Wheaton	Operating System Virtualization
110202	Illinois Institute of Technology	Chicago	Java/SQL Databases/Data Analytics
110202	Illinois Institute of Technology	Chicago	Java/SQL Databases/Database Security
110202	Illinois Institute of Technology	Chicago	Linux+ Certification Training

Symbol Job Training	Skokie	CNC 203: CNC Programming
Vatterott College	Berkeley	Heating
Waubensee Community College	Aurora	Heating

## Appendix F: References and Resources

A major source of information for this report was the Society for College and University Planning (SCUP). Many of the trends identified by SCUP have been expanded and validated with the most current data available for the Harper district. Primary data sources used for this scan were public agencies that included the Illinois Department of Employment Security, Illinois State Board of Education, Illinois Interactive Report Card, U.S. Bureau of Labor Statistics, U.S. Census Bureau, the Illinois Comptroller's Office, and the Illinois Department of Revenue. Some resources came from private institutions providing freely accessible data such as the Woodstock Institute. A few subscription-based data resources are from private, for-profit companies such as Alteryx and Easi Analytics.
