2012 National Community College Benchmarking Project

Results for Harper College

The National Community College Benchmark Project (NCCBP) allows participating community colleges to compare themselves to other institutions on up to 145 items covering student measures (student degree/certificate completion or transfer, student course performance, student persistence and course retention, student satisfaction) and institutional measures (institutional characteristics, minority participation, market penetration, and business and industry productivity). Some items were provided to characterize the college such as "rural, suburban or urban setting." Colleges do not have to provide values for every item. Harper provided values for 121 items in fiscal year 2012. The 2012 fiscal year marked the sixth consecutive year of Harper's participation in NCCBP.

The results are displayed in the following sections:

- The **Equivalency Table** provides a legend to compare the NCCBP Metric with Harper's Institutional Effectiveness Measure.
- The **Aggregated Report** received back from NCCBP which displays the data that Harper submitted as well as how Harper compares or "benchmarks" against the other institutions that participated in the survey for fiscal year 2012 (01July 2012 through 30 June 2012).
  For each item, Harper's value and percentile rank are reported. Additionally, norm values for the 10th, 25th, median (Mdn or 50th percentile), 75th, and 90th percentile are provided. For example, on Form 1 Harper's reported Service Area Total Population was 531,656 which was at the 72nd percentile. This means that 72 percent of the 267 colleges reporting on this item had service area populations less than Harper's service area population, or conversely that the population of Harper's district is greater than all but 28% of the districts of the colleges responding to the 2012 NCCBP survey.
- The **Strengths Report** highlights benchmarks for which Harper was above the 85th percentile of all 267 participating institutions.
- The **Peer Comparison Graphs** provide both tables and graphs of key metric areas in relation to Illinois community colleges.
- The **Best Practices Report** compiled by NCCBP. This best practices report is based on data submitted by 267 institutions during the 2012 data collection cycle. The report is generally confined to benchmarks dealing with student learning outcomes. Institutions listed are those that were at or above the 85th percentile for a given benchmark. As noted in the report, for some benchmarks it was more appropriate to list institutions at or below the 15th percentile. Only institutions that consented to be listed in this report were included.
- The **final worksheet displaying** the data that Harper submitted to NCCBP for each item in the data collection template.

Harper will be participating in the NCCBP data collection for fiscal year 2013.

Institutional Strengths Report

Harper College

Reporting year: 2012. Accessed on Thursday, August 23, 2012, 04:06 pm, CT.

The Institutional Strengths Report highlights benchmarks for which your institution was above the 85th percentile of all 272 participating institutions. Note: for some benchmarks it is more appropriate to identify those at or below the 15th percentile.

Peer Group Comparisons

Note: these graphs were developed using the benchmarking tool at http://www.nccbp.org/; the tool does not identify individual colleges other than the college to which all others in the peer group are being compared. The values displayed are from the 2012 Aggregate Data Report.

For metrics displayed as a percent of a whole, the axis range is set from 0% to 100%. This is to prevent misinterpretation of the results from zooming in and subsequently over emphasizing what are small differences in scores.
