

# MyMathTest : Registration for November, 2012

## REGISTERING:

1. Go to the following website: [www.mymathtest.com](http://www.mymathtest.com)
2. Click 
3. Scroll down and click 
4. Next to “Do you have a Pearson Education Account?” click “No” and then fill in a login name and password and then reenter your password. **Write this information down someplace so that you won’t forget what you used.**
5. Enter the following access code exactly as shown below:  
**WSSMMT-SCOFF-COCCI-ADANA-JABOT-VEXES**  
then click 
6. Under **Account Information** put your real name and an email address that you check on a regular basis. For the school zipcode put 60067 and then pick Wm. Rainey Harper College from the list of schools. Fill in the security question information and then click 
7. You can print the **Confirmation & Summary** page.

## ACCESSING THE TESTS AND PRACTICE MATERIALS:

1. Go to the following website: [www.mymathtest.com](http://www.mymathtest.com)
2. Under **Log in** type the login name and password that you created above when you were registering and then click 
3. Click 
4. Under **Enroll in a new placement program** type the following course ID number:  
[XL0Y-M1D9-101Z-10W2](#)  
You should now see the following: **Is this your program?** **Prep for Compass Math** Click 
5. On the announcement page there click [Browser Check](#), so that the system will check if there are any plugins that your computer needs for this site.
6. Now you are ready to begin. Click . Click [Practice Tests](#).
7. Click on  [The Real Number System R2-A](#) (or you can start at a higher level topic. On the announcement page there is a list of tests that you should work through to place into a particular class).
8. Click 
9. Answer the question, click  and continue through the test.
10. Click  when you are done.
11. You can now click  or .
12. Now click .
13. Click on the “+” next to  [Ch. R2: The Real Number System](#) to expand the list of topics. You can then click the “+” next to each of the subtopics listed there. There is a  next to any concept that you still need to work on. Click on the name of the first topic listed that has a pencil by it and work on the practice problems there. Take advantage of the buttons that say  and . There are also some practice problems that have a button that says .
14. Keep clicking the topics that have pencils by them and keep practicing problems.
15. When you think you are ready, you can take the post test for The Real Number System. Click . Click [Practice Tests](#) and click on  [The Real Number System R2-B](#). Take this test and then look at your study plan to see if any of the pencils were removed. If there are still pencils next to any of the topics under The Real Number System, then you still need to practice more and retake the test again.
16. You can continue to work in this way: Take test R3-A. Go to the study plan to see what you need to work on under R3. Practice, practice, practice and then take test R3-B and see which pencils were removed from your study plan. If there are any pencils left, you still need to work on those specific topics. Keep progressing through the tests as high as you can. **You will only have access to this site for 16 weeks so review all you can in that time :0)**
