Dynamics of Domestic Violence

Power and Control Tactics

Domestic violence involves a pattern of abusive behaviors inflicted by one person on another within the context of an intimate relationship.

The intent of domestic violence is to exert power and control over another.

The crisis of domestic violence has been characterized as an epidemic in the State of Illinois.

The impact of domestic violence on society reaches far beyond the devastation inflicted on the lives of its victims and their children. It extends to the health care, criminal justice, court, child welfare, mental health and social service systems.
